

SCOTTISH MORTGAGE INVESTMENT TRUST PLC

Your low cost choice
for global investment

Interim Financial Report
30 September 2021

Scottish Mortgage Investment Trust PLC is a low cost investment trust that aims to maximise total return over the long term from a high conviction, actively managed portfolio. It invests globally, looking for strong businesses with above-average returns.

Benchmark

The portfolio benchmark against which performance is measured is the FTSE All-World Index (in sterling terms).

Principal Risks and Uncertainties

The principal risks facing the Company are financial risk, private company investments risk, investment strategy risk, discount risk, regulatory risk, custody and depositary risk, operational risk, leverage risk and political risk. An explanation of these risks and how they are managed is set out on pages 9 and 10 of the Company's Annual Report and Financial Statements for the year to 31 March 2021 which is available on the Company's website: scottishmortgageit.com.

The principal risks and uncertainties have not changed since the date of that report with the exception of the ongoing situation regarding Covid-19.

Responsibility Statement

We confirm that to the best of our knowledge:

- a) the condensed set of Financial Statements has been prepared in accordance with FRS 104 'Interim Financial Reporting';
- b) the Interim Management Report includes a fair review of the information required by Disclosure and Transparency Rule 4.2.7R (indication of important events during the first six months, their impact on the condensed set of Financial Statements and a description of the principal risks and uncertainties for the remaining six months of the year); and
- c) the Interim Financial Report includes a fair review of the information required by Disclosure and Transparency Rule 4.2.8R (disclosure of related party transactions and changes therein).

By order of the Board
Fiona McBain
Chair
5 November 2021

Interim Management Report

Philosophy

We aim to identify, own and support the world's most exceptional growth companies whether public or private; companies that offer the potential of genuinely transformative returns. Over the long-run, it is such companies that drive stock-market returns. They make equity investing truly worthwhile.

We see our role as partners to these companies. Supporting them through the provision of both capital and patience and backing them to do incredible things. Their path will rarely be a straight-line. All great companies face periods of difficulty and market doubt, if not outright hostility. These periods can be difficult to endure but great returns cannot be achieved without such testing journeys.

This requires us to be resolutely long-term through both good times and bad. The road ahead will have its fair share of bumps, some companies will not work out as hoped but it is through supporting and holding onto just a small number of extraordinary companies that exceptional returns can be achieved.

Returns

This approach has driven our returns. Over ten years Scottish Mortgage's net asset value per share with debt at fair value (NAV) has increased by 1,072% versus a 275% increase in the FTSE All-World index (both in total return terms). Over five years it has increased by 341% against 83%. Six months of data is always too short a period to infer much that is useful from stock prices. However, since the end of March our NAV rose by 16% compared to a 9% increase in the index.

Although our focus remains on long-term capital appreciation we are aware that a small but consistent dividend is of value to many shareholders. Acknowledging the Company's recent performance, the Board is recommending an interim dividend of 1.52p, an increase of 5% over last year's payment of 1.45p.

Portfolio

Over short periods, such as the last six months, the market has naturally found various things to worry about. A long-term approach is helpful here. It enables us to focus not on the cacophony of the stock-markets but the more predictable drumbeat of deep underlying progress. It has been the long-term and exponential improvements in computing technologies, genomic sequencing and energy storage that continue to strike us as the most important determinates of long-term returns.

These long-term trends may be too slow to shape financial news headlines in a single period but they compound over time as they grow in impact. Moreover, the powerful trends in computing technologies appear to not just be continuing but broadening in utility and application beyond the narrow remits of consumer internet to industries larger and far more diverse.

This broadening is slowly being reflected in the changing shape of the portfolio. The Trust's investment in healthcare and biology companies for example has grown from 11.6% a year ago to 21.4% today. We are finding and supporting a growing number of businesses that we believe are benefiting from the intersection of biology and information technology.

For a definition of terms see Glossary of Terms and Alternative Performance Measures on pages 22 and 23.

Total return information sourced from Refinitiv/StatPro/Baillie Gifford.

See disclaimer on page 22.

Past performance is not a guide to future performance.

Our largest holding, Moderna has been the greatest contributor to this change, writing what is effectively code in the form of RNA to program human cells. Moderna has helped the world to start escaping the tragedies and confinement of the last 18 months. However, it is the breadth and scalability of its mRNA technology platform rather than its Covid vaccine that holds the greatest promise. Its pipeline of programs is both large and growing, targeting diseases such as flu, Zika, HIV, cancer and many more.

Recursion Pharmaceuticals and Tempus are successfully leveraging growing quantities of big data combined with machine learning to powerful effect in drug discovery and cancer treatment. We took a new holding in 10x Genomics whose products enable the analysis of single cells complementing Illumina's next generation sequencing and enabling a more granular understanding of biology.

We continue to see opportunities for technology platforms to improve resource allocation in the economy across a growing range of areas such as freight, food and finance. At the same time the question of how to regulate big tech platforms continues to challenge law-makers across the globe. China has taken to this task with particular vigour. It has demonstrated far greater speed and forcefulness in approach than elsewhere. This sharp adjustment has naturally presented challenges both in market sentiment and for technology businesses that are having to adapt to a rapidly altering regulatory environment. At the same time there has been a push for the rewards of China's growing prosperity to be more evenly distributed. Together these shifts have negatively impacted the share prices of many of our Chinese holdings.

The underlying progress of the companies however remains surprisingly strong. Alibaba and Tencent both continue to grow revenue in excess of 20% whilst Meituan and Pinduoduo are both growing considerably faster. The companies themselves are keenly aware of their need to contribute not just to shareholder returns but to society to ensure true sustainability. We will continue to assess the long-term implications of the new regulatory approach as they apply to each of our holdings.

Outlook

Our attention remains focused on maximising returns over the next ten years for Scottish Mortgage shareholders. We have no right to claim insight over the possible gyrations of stock markets over shorter time periods.

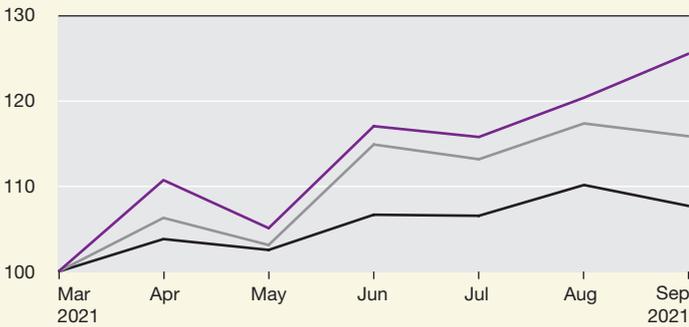

As we anticipate the next decade we are both optimistic and enthused. It strikes us that there are multiple drivers of change and thus opportunity. These include the continuing digitisation of our economy, the intersection of information technology and biology and the much-needed energy transition. Together they provide an opportunity set that is profound and diverse. We look forward to continuing to back the companies and visionaries that drive and take advantage of these powerful long-term trends.

The principal risks and uncertainties facing the Company are set out on the inside front cover of this report.

Notes to the Financial Statements (unaudited)

- 1 The condensed Financial Statements for the six months to 30 September 2021 comprise the statements set out on pages 14 to 17 together with the related notes on pages 18 to 20. They have been prepared in accordance with FRS 104 'Interim Financial Reporting' and the AIC's Statement of Recommended Practice issued in November 2014 and updated in October 2019 and April 2021 with consequential amendments. They have not been audited or reviewed by the Auditor pursuant to the Auditing Practices Board Guidance on 'Review of Interim Financial Information'. The Financial Statements for the six months to 30 September 2021 have been prepared on the basis of the same accounting policies as set out in the Company's Annual Report and Financial Statements at 31 March 2021.

Going Concern

The Directors have considered the nature of the Company's assets, its liabilities, projected income and expenditure together with its investment objective and policy, dividend policy and principal risks and uncertainties, as set out on the inside front cover. The Board has, in particular, considered the impact of heightened market volatility during the Covid-19 pandemic but does not believe the Company's going concern status is affected. The Company's assets, the majority of which are in quoted securities which are readily realisable, exceed its liabilities significantly. All borrowings require the prior approval of the Board. Gearing levels and compliance with borrowing covenants are reviewed by the Board on a regular basis. The Company has continued to comply with the investment trust status requirements of section 1158 of the Corporation Tax Act 2010 and the Investment Trust (Approved Company) Regulations 2011. Accordingly, the Directors considered it appropriate to adopt the going concern basis of accounting in preparing these Financial Statements and confirm that they are not aware of any material uncertainties which may affect the Company's ability to continue in operational existence for a period of at least twelve months from the date of approval of these Financial Statements.

- 2 The financial information contained within this Interim Financial Report does not constitute statutory accounts as defined in sections 434 to 436 of the Companies Act 2006. The financial information for the year ended 31 March 2021 has been extracted from the statutory accounts which have been filed with the Registrar of Companies. The Auditors' Report on those accounts was not qualified, did not include a reference to any matters to which the Auditors drew attention by way of emphasis without qualifying its report and did not contain statements under sections 498 (2) or (3) of the Companies Act 2006.
- 3 Baillie Gifford & Co Limited, a wholly owned subsidiary of Baillie Gifford & Co, has been appointed by the Company as its Alternative Investment Fund Manager (AIFM) and Company Secretary. The investment management function has been delegated to Baillie Gifford & Co. The management agreement can be terminated on six months' notice. The annual management fee is 0.30% on the first £4 billion of total assets less current liabilities (excluding short term borrowings for investment purposes) and 0.25% thereafter, calculated and payable quarterly.

4 Net Return per Ordinary Share

	Six months to 30 September 2021 £'000	Six months to 30 September 2020 £'000
Revenue return on ordinary activities after taxation	8,715	6,993
Capital return on ordinary activities after taxation	2,654,201	6,348,467
Total net return	2,662,916	6,355,460
Weighted average number of ordinary shares in issue	1,416,515,214	1,464,928,674

The net return per ordinary share figures are based on the above totals of revenue and capital and the weighted average number of ordinary shares in issue during each period.

There are no dilutive or potentially dilutive shares in issue.

5 Dividends

	Six months to 30 September 2021 £'000	Six months to 30 September 2020 £'000
Amounts recognised as distributions in the period:		
Previous year's final dividend of 1.97p (2020 – 1.86p), paid 1 July 2021	27,984	27,306
	27,984	27,306
Dividends proposed in the period:		
Interim dividend for the year ending 31 March 2022 of 1.52p (2021 – 1.45p)	21,459	21,167
	21,459	21,167

The interim dividend was declared after the period end date and has therefore not been included as a liability in the Balance Sheet. It is payable on 3 December 2021 to shareholders on the register at the close of business on 19 November 2021. The ex-dividend date is 18 November 2021. The Company's Registrars offer a Dividend Reinvestment Plan and the final date for elections for this dividend is 22 November 2021.

6 Fair Value Hierarchy

The fair value hierarchy used to analyse the basis on which the fair values of financial instruments held at fair value through the profit and loss account are measured is described below. The levels are determined by the lowest (that is the least reliable or least independently observable) level of input that is significant to the fair value measurement for the individual investment in its entirety as follows:

Level 1 – using unadjusted quoted prices for identical instruments in an active market;

Level 2 – using inputs, other than quoted prices included within Level 1, that are directly or indirectly observable (based on market data); and

Level 3 – using inputs that are unobservable (for which market data is unavailable).

The Company's investments are financial assets designated at fair value through profit or loss. An analysis of the Company's financial asset investments based on the fair value hierarchy described above is shown below.

Investments held at fair value through profit or loss

As at 30 September 2021	Level 1 £'000	Level 2 £'000	Level 3 £'000	Total £'000
Equities/funds	16,846,771	–	–	16,846,771
Private company ordinary shares	–	–	587,463	587,463
Private company preference shares	–	–	3,391,581	3,391,581
Private company convertible note	–	–	16,874	16,874
Warrants	–	–	8,430	8,430
Limited partnership investments	–	–	104,839	104,839
Total financial asset investments	16,846,771	–	4,109,187	20,955,958

As at 31 March 2021 (audited)	Level 1 £'000	Level 2 £'000	Level 3 £'000	Total £'000
Equities/funds	14,345,430	–	–	14,345,430
Private company ordinary shares	–	–	597,839	597,839
Private company preference shares	–	–	3,004,792	3,004,792
Private company convertible note	–	–	15,949	15,949
Warrants	–	–	6,764	6,764
Limited partnership investments	–	–	71,914	71,914
Total financial asset investments	14,345,430	–	3,697,258	18,042,688

During the period, investments with a book cost of £281,364,000 were transferred from Level 3 to Level 1 on becoming listed. The fair value of listed investments is bid value or, in the case of holdings on certain recognised overseas exchanges, last traded price. Listed Investments are categorised as Level 1 if they are valued using unadjusted quoted prices for identical instruments in an active market and as Level 2 if they do not meet all these criteria but are, nonetheless, valued using market data.

Private company investments

The Company's holdings in unlisted (private company) investments are categorised as Level 3. Private company investments are valued at fair value by the Directors following a detailed review and appropriate challenge of the valuations proposed by the Managers. The Managers' private company investment policy applies techniques consistent with the International Private Equity and Venture Capital Valuation Guidelines 2018 ('IPEV'). The techniques applied are predominantly market-based approaches. The market-based approaches available under IPEV are set out below and are followed by an explanation of how they are applied to the Company's private company portfolio:

- Multiples;
- Industry Valuation Benchmarks; and
- Available Market Prices.

The nature of the private company portfolio will influence the valuation technique applied. The valuation approach recognises that, as stated in the IPEV Guidelines, the price of a recent investment, if resulting from an orderly transaction, generally represents fair value as at the transaction date and may be an appropriate starting point for estimating fair value at subsequent measurement dates. However, consideration is given to the facts and circumstances as at the subsequent measurement date, including changes in the market or performance of the investee company. Milestone analysis is used where appropriate to incorporate the operational progress of the investee company into the valuation. Additionally, the background to the transaction must be considered. As a result, various multiples-based techniques are employed to assess the valuations particularly in those companies with established revenues. Discounted cashflows are used where appropriate. An absence of relevant industry peers may preclude the application of the Industry Valuation Benchmarks technique and an absence of observable prices may preclude the Available Market Prices approach. All valuations are cross-checked for reasonableness by employing relevant alternative techniques.

6 Fair Value Hierarchy (continued)

The private company investments are valued according to a three monthly cycle of measurement dates. The fair value of the private company investments will be reviewed before the next scheduled three monthly measurement date on the following occasions:

- At the year end and half year end of the Company; and
- Where there is an indication of a change in fair value as defined in the IPEV guidelines (commonly referred to as ‘trigger’ events).

7 The total value of the borrowings (at book) is £1,641,824,000 (31 March 2021 – £1,237,332,000).

The bank loans falling due within one year are a US\$391 million revolving 3 year loan with National Australia Bank Limited (‘NAB’) and a US\$50 million revolving 5 year loan with The Royal Bank of Scotland International Limited (‘RBS’) (31 March 2021 – US\$200 million revolving 3 year loan with NAB, a US\$80 million revolving 3 year loan with RBS and a US\$85 million revolving 2 year loan with RBS).

The bank loans falling due after more than one year are a US\$200 million fixed rate loan and a US\$180 million fixed rate loan with RBS and a US\$300 million fixed rate loan with The Bank of Nova Scotia.

During the period, the US\$200 million revolving 3 year loan with NAB was refinanced with a US\$391 million revolving 3 year loan with NAB, the US\$80 million revolving 3 year loan with RBS was refinanced on expiry with a US\$180 million 5 year fixed rate credit facility with RBS and the US\$85 million revolving 2 year loan with RBS was part refinanced with a US\$50 million revolving 5 year loan with RBS.

During the period the Company issued the following private placement unsecured loan notes:

- £100 million at a coupon of 2.03% maturing on 10 August 2036; and
- £100 million at a coupon of 2.30% maturing on 10 August 2046.

Following the period end, on 12 October 2021, a US\$120 million revolving 3 year loan was drawn down from Industrial and Commercial Bank of China Limited (‘ICBC’).

8 The fair value of the borrowings at 30 September 2021 was £1,674,997,000 (31 March 2021 – £1,309,443,000).

9 Share Capital: Ordinary Shares of 5p Each

	At 30 September 2021	At 31 March 2021 (audited)
	No. of shares	No. of shares
Allotted, called up and fully paid	1,411,799,194	1,421,618,969

In the six months to 30 September 2021, the Company sold 850,000 ordinary shares from treasury with a nominal value of £42,500 at a premium to net asset value raising net proceeds of £12,213,000 (year to 31 March 2021 – issued 24,725,000 ordinary shares, with a nominal value of £1,236,250, at a premium to net asset value, raising net proceeds of £193,559,000).

In the six months to 30 September 2021, 10,669,775 ordinary shares with a nominal value of £533,000 were bought back at a total cost of £137,732,000 and held in treasury (year to 31 March 2021 – 56,365,839 shares with a nominal value of £2,818,000 were bought back at a total cost of £613,920,000 and held in treasury). At 30 September 2021 the Company had authority remaining to buy back 208,586,466 ordinary shares.

10 Transaction costs on acquisitions within the portfolio amounted to £382,000 (30 September 2020 – £1,364,000) and transaction costs on sales amounted to £190,000 (30 September 2020 – £88,000). These costs are included in the book cost of acquisitions and in the net proceeds of disposals.

11 Related Party Transactions

There have been no transactions with related parties during the first six months of the current financial year that have materially affected the financial position or the performance of the Company during that period and there have been no changes in the related party transactions described in the last Annual Report and Financial Statements that could have had such an effect on the Company during that period.

None of the views expressed in this document should be construed as advice to buy or sell a particular investment.

Further Shareholder Information

How to Invest

Scottish Mortgage's shares are traded on the London Stock Exchange. They can be bought by placing an order with a stockbroker or by asking a professional adviser to do so. If you are interested in investing directly in Scottish Mortgage you can do so online. There are a number of companies offering real time online dealing services – find out more by visiting scottishmortgageit.com.

Dividend Reinvestment Plan

Computershare operate a Dividend Reinvestment Plan which can be used to buy additional shares instead of receiving your dividend via cheque or into your bank account. For further information log in to investorcentre.co.uk and follow the instructions or telephone 0370 707 1694.

Risk Warnings

- Past performance is not a guide to future performance.
- Scottish Mortgage is listed on the London Stock Exchange. The value of its shares and any income from them can fall as well as rise and investors may not get back the amount invested.
- Scottish Mortgage has a significant exposure to private companies. The risk could be increased as these assets may be more difficult to buy or sell, so changes in their prices may be greater.
- Scottish Mortgage invests in overseas securities. Changes in the rates of exchange may also cause the value of your investment (and any income it may pay) to go down or up.
- Scottish Mortgage invests in emerging markets where difficulties in dealing, settlement and custody could arise, resulting in a negative impact on the value of your investment.
- Scottish Mortgage has borrowed money to make further investments (sometimes known as 'gearing' or 'leverage'). The risk is that when this money is repaid by the Company, the value of the investments may not be enough to cover the borrowing and interest costs and the Company will make a loss. If the Company's investments fall in value, any invested borrowings will increase the amount of this loss.

- Scottish Mortgage can buy back its own shares. The risks from borrowing, referred to above, are increased when a company buys back its own shares.
- Market values for securities which have become difficult to trade may not be readily available and there can be no assurance that any value assigned to such securities will accurately reflect the price the Company might receive upon their sale.
- Scottish Mortgage can make use of derivatives which may impact on its performance.
- Share prices may either be below (at a discount) or above (at a premium) the net asset value (NAV). The Company may issue new shares when the price is at a premium which will reduce the share price. Shares bought at a premium can therefore quickly lose value.
- Scottish Mortgage charges 100% of the investment management fee and 100% of borrowing costs to capital which reduces the capital value.
- You should note that tax rates and reliefs may change at anytime and their value depends on circumstances.

The Company is listed on the London Stock Exchange and is not authorised or regulated by the Financial Conduct Authority.

The staff of Baillie Gifford and the Directors of Scottish Mortgage may hold shares in Scottish Mortgage and may buy or sell such shares from time to time.

Further details of the risks associated with investing in the Company, including how charges are applied, can be found at scottishmortgageit.com, or by calling Baillie Gifford on 0800 917 2112.

The information and opinions expressed within this Interim Financial Report are subject to change without notice. The information on this page has been issued and approved by Baillie Gifford & Co Limited, the Managers and Secretaries, and does not in any way constitute investment advice.

Automatic Exchange of Information

In order to fulfil its obligations under UK tax legislation relating to the automatic exchange of information, Scottish Mortgage Investment Trust PLC is required to collect and report certain information about certain shareholders.

The legislation requires investment trust companies to provide personal information to HMRC on certain investors who purchase shares in investment trusts. Accordingly, Scottish Mortgage Investment Trust PLC will have to provide information annually to the local tax authority on the tax residencies of a number of

non-UK based certificated shareholders and corporate entities. Shareholders, excluding those whose shares are held in CREST, who come on to the share register will be sent a certification form for the purposes of collecting this information.

For further information, please see HMRC's Quick Guide: Automatic Exchange of Information – information for account holders gov.uk/government/publications/exchange-of-information-account-holders.

Glossary of Terms and Alternative Performance Measures (APM)

Total Assets

Total assets less current liabilities, before deduction of all borrowings.

Net Asset Value

Also described as shareholders' funds. Net Asset Value (NAV) is the value of total assets less liabilities (including borrowings). Net Asset Value is calculated on the basis of borrowings stated at book value or fair value. An explanation of each basis is provided below. The NAV per share is calculated by dividing this amount by the number of ordinary shares in issue (excluding treasury shares).

Net Asset Value (Borrowings at Book)/Shareholders' Funds

Borrowings are valued at adjusted net issue proceeds. The value of the borrowings at book is set out in note 7 on page 20

Net Asset Value (Borrowings at Fair Value) (APM)

Borrowings are valued at an estimate of their market worth. The value of the borrowings at fair is set out in note 8 on page 20 and a reconciliation to Net Asset Value with borrowings at book value is provided below.

	30 September 2021	31 March 2021
Net Asset Value per ordinary share (borrowings at book value)	1,381.1p	1,195.1p
Shareholders' funds (borrowings at book value)	£19,498,883k	£16,989,470k
Add: book value of borrowings	£1,641,824k	£1,237,332k
Less: fair value of borrowings	(£1,674,997k)	(£1,309,443k)
Net Asset Value (borrowings at fair value)	£19,465,710k	£16,917,359k
Shares in issue at year end (excluding treasury shares)	1,411,799,194	1,421,618,969
Net Asset Value per ordinary share (borrowings at fair value)	1,378.8p	1,190.0p

Net Liquid Assets

Net liquid assets comprise current assets less current liabilities, excluding borrowings.

Discount/Premium (APM)

As stockmarkets and share prices vary, an investment trust's share price is rarely the same as its NAV. When the share price is lower than the NAV per share it is said to be trading at a discount. The size of the discount is calculated by subtracting the share price from the NAV per share and is usually expressed as a percentage of the NAV per share. If the share price is higher than the NAV per share, it is said to be trading at a premium.

Gearing (APM)

At its simplest, gearing is borrowing. Just like any other public company, an investment trust can borrow money to invest in additional investments for its portfolio. The effect of the borrowing on the shareholders' assets is called 'gearing'. If the Company's assets grow, the shareholders' assets grow proportionately more because the debt remains the same, but if the value of the Company's assets falls, the situation is reversed. Gearing can therefore enhance performance in rising markets but can adversely impact performance in falling markets.

Gearing represents borrowings at book value less cash and cash equivalents (including any outstanding trade settlements) expressed as a percentage of shareholders' funds.

Turnover (APM)

Annual turnover is calculated on a rolling 12 month basis. The lower of purchases and sales for the 12 months is divided by the average assets, with average assets being calculated on assets as at each month's end.

Active Share (APM)

Active share, a measure of how actively a portfolio is managed, is the percentage of the portfolio that differs from its comparative index. It is calculated by deducting from 100 the percentage of the portfolio that overlaps with the comparative index. An active share of 100 indicates no overlap with the index and an active share of zero indicates a portfolio that tracks the index.

Total Return (APM)

The total return is the return to shareholders after reinvesting the net dividend on the date that the share price goes ex-dividend.

		30 September 2021			30 September 2020		
		NAV (book)	NAV (fair)	Share price	NAV (book)	NAV (fair)	Share price
Closing NAV per share/share price	(a)	1,381.1p	1,378.8p	1,428.0p	999.8p	992.0p	991.0p
Dividend adjustment factor*	(b)	1.0020	1.0012	1.0016	1.0026	1.0025	1.0023
Adjusted closing NAV per share/share price	(c = a x b)	1,383.9p	1,380.4p	1,430.3p	1,002.4p	994.5p	993.3p
Opening NAV per share/share price	(d)	1,195.1p	1,190.0p	1,137.0p	567.3p	565.7p	573.5p
Total return	(c ÷ d)-1	15.8%	16.0%	25.8%	76.7%	75.8%	73.2%

* The dividend adjustment factor is calculated on the assumption that the final dividend of 1.97p (2020 – 1.86p) paid by the Company during the period was reinvested into shares of the Company at the cum income NAV per share/share price, as appropriate, at the ex-dividend date.
