

Investment proposition

The Worldwide Islamic Global Equities Fund aims to produce long-term returns by investing in a concentrated portfolio of Sharia-compliant stocks, constructed with little regard to an index. The Fund adopts a long-term time horizon of five years and beyond and positioning is based on bottom-up stock selection. Along with our growth investment philosophy we look for companies that meet Sharia principles as interpreted and laid down by the Sharia Supervisory Board and the relevant environmental, social and governance criteria. We exclude companies that do not, at a minimum, meet the fundamental responsibilities of the United Nations Global Compact Principles for Business and are inconsistent with Sharia principles. The Fund's investment managers draw on a combination of their own ideas and that of other investment teams at Baillie Gifford to construct a portfolio of between 30 to 50 companies.

Baillie Gifford operates a single swinging price for the Fund and, therefore, may apply a dilution adjustment to the price to protect long-term investors from the costs associated with buying and selling underlying investments that result from other investors joining or leaving the Fund. This adjustment will affect relative performance, either positively or negatively.

Investment markets can go down as well as up and market conditions can change rapidly. The value of an investment in the Fund, and any income from it, can fall as well as rise and investors may not get back the amount invested.

The specific risks associated with the Fund include:

Custody of assets, particularly in emerging markets, involves a risk of loss if a custodian becomes insolvent or breaches duties of care.

The Fund invests in emerging markets where difficulties in trading could arise, resulting in a negative impact on the value of your investment.

The Fund's concentrated portfolio relative to similar funds may result in large movements in the share price in the short term.

The Fund has exposure to foreign currencies and changes in the rates of exchange will cause the value of any investment, and income from it, to fall as well as rise and you may not get back the amount invested.

The Fund invests in companies whose business complies with Sharia principles, with specific focus on companies that have a purpose to deliver positive societal impact. The universe of available investments will be more limited than other funds that do not apply such criteria/exclusions, therefore the Fund may have different returns than a fund which has no such restriction. Data used to apply the criteria may be provided by third party sources and is based on backward-looking analysis and the subjective nature of non-financial criteria means a wide variety of outcomes are possible.

There is a risk that data provided may not adequately address the underlying detail around material non-financial considerations.

Please consider all of the characteristics and objectives of the fund as described in the Key Information Document (KID) and prospectus before making a decision to invest in the Fund. For more information on how sustainability issues, such as climate change are considered, see bailliegifford.com.

The Fund intends to observe Sharia at all times but cannot guarantee this will be the case. An investment made in the Fund may subsequently be determined to no longer be Sharia compliant. In this instance, the Investment Manager and Sharia Supervisory Board will determine how to dispose of the investment and purify the Fund. These disposals may be made in disadvantageous circumstances and may result in losses to the Fund.

The Fund's share price can be volatile due to movements in the prices of the underlying holdings and the basis on which the Fund is priced.

Further details of the risks associated with investing in the Fund can be found in the Key Information Document (KID), or the Prospectus. Copies of both the KID and Prospectus are available at bailliegifford.com.

Active Share - A measure of the Fund's overlap with the benchmark. An active share of 100 indicates no overlap with the benchmark and an active share of zero indicates a portfolio that tracks the benchmark.
