Investment proposition

The Worldwide Pan European Fund aims to produce long-term returns by investing in a concentrated portfolio of European stocks, constructed with little regard to the index. The Fund adopts a long-term time horizon of five years and beyond and positioning is based on bottom-up stock selection. Along with our growth investment philosophy we look for companies that meet our environmental, social and governance criteria by applying exclusions from certain industries and those that are inconsistent with the United Nations Global Compact Principles for Business.

Baillie Gifford operates a single swinging price for the Fund and, therefore, may apply a dilution adjustment to the price to protect long-term investors from the costs associated with buying and selling underlying investments that result from other investors joining or leaving the Fund. This adjustment will affect relative performance, either positively or negatively.
