### Fund Objective

To outperform (after deduction of costs) the S&P 500 Index, as stated in sterling, by at least 1.5% per annum over rolling five-year periods.

The manager believes this is an appropriate target given the investment policy of the Fund and the approach taken by the manager when investing. In addition, the manager believes an appropriate performance comparison for this Fund is the Investment Association North America Sector.

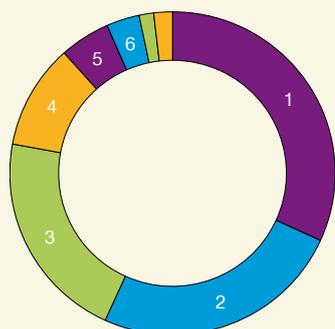

There is no guarantee that this objective will be achieved over any time period and actual investment returns may differ from this objective, particularly over shorter time periods.

### Investment Proposition

We are bottom-up, growth investors with a long-term horizon. We back our judgement, running a concentrated portfolio (usually between 30-50 stocks), with low turnover. The team aims to deliver outstanding investment performance by harnessing the asymmetry of returns inherent in equity markets. We believe we will maximise our chances of achieving this aim by identifying the exceptional growth businesses in America and owning them for long enough that the advantages of their business models and cultural strengths become the dominant drivers of their stock prices. We take a 5 year view when investing in stocks and are not driven by short-term trends.

## Additional Fund Information

The Fund is a sub-fund of the Baillie Gifford Overseas Growth Funds ICVC (Investment Company with Variable Capital) which is an umbrella Open-Ended Investment Company. Its Authorised Corporate Director ('ACD') is Baillie Gifford & Co Limited.

The yields quoted are historic yields based on distributions paid by the Fund in the previous 12 months as a percentage of the mid-market share price, as at the date shown. Investors may be subject to tax on their distributions. The disruption caused by the Coronavirus to global economies, markets and companies could reduce the distributions paid by the Fund in the future.

The ongoing charge figure may vary from year to year and will exclude the costs of buying and selling assets for the Fund (unless these assets are shares of another fund). Further explanation of all the charges and costs relating to this Fund can be found in the Enhanced Disclosure of Fund Charges and Costs document which is available through our website, [bailliegifford.com](http://bailliegifford.com).

Active Share is a measure of how actively managed a Fund is and is calculated by taking 100 minus the % of the Fund that overlaps with the comparative index. An active share of 100 indicates no overlap with the comparative index and an active share of zero indicates a portfolio that tracks the comparative index. We have chosen to show Active Share against the S&P 500 Index.

Turnover is calculated by taking the smaller figure of either total purchases or total sales for the month and dividing it by an average market value. The Annual Turnover is then calculated as the sum of the monthly turnover figures for the 12 month period.
