Results for the six months to 30 September 2020

The following is the unaudited Interim Financial Report for the six months to 30 September 2020 which was approved by the Board on 5 November 2020.

Interim management report

Over the long run, stock market returns are driven by a small number of exceptional companies. The progress of such companies is rarely smooth or linear. They have breakthroughs and they have setbacks. Sentiment in the market exaggerates the peaks and troughs, driving price volatility that is commonly mistaken for risk. When we believe we have identified an exceptional company that is pursuing a large opportunity, we look beyond this cycle of feast and famine. With a longer timeframe, such oscillations matter less and the picture of compounding growth becomes clearer. Many, if not most, investments won't turn out as we hope. However, for the companies that do succeed, the returns are transformational and they have a disproportionate impact on the portfolio. This is why we approach our task with optimism. It is more important to identify the factors that will allow a company to prosper than to enumerate the potential pitfalls along the way. This approach has driven our long-run returns. Over five years Scottish Mortgage's net asset value per share with debt at fair value (NAV) has increased by 340% versus a 96% increase in the FTSE All-World index (both in total return terms). Over 10 years it has increased by 674% against 191%. Six months of data is too short a period to infer much that is useful from stock prices. Since the end of March our NAV rose by 76% compared to a 24% increase in the index.

Whilst our focus is on the generation of long-term increases in capital values, we recognise that a small but consistent dividend is of value to many investors. The Board is therefore recommending an interim dividend of 1.45p, a modest increase to the previous year.

Looking at the recent period, we must avoid the temptation to match outcomes with easy or obvious explanations. The global pandemic has, for sure, had big short-term impacts but a company's stock price incorporates an estimate of all future cashflows and is not simply a measure of relative success at this unusual time. The oddities of the pandemic will fade, some long-running shifts in our economy will have been accelerated and the stresses we have experienced will spark new waves of innovation. More importantly for your portfolio, several holdings have made considerable progress and we have greater clarity on both the size of opportunity and the companies' ability to execute.

The increase in Tesla's stock price and its dramatic impact on the Trust's returns should be seen in context. Whilst the company and its colourful founder attract an unusually high degree of attention, emotion and noise, the underlying return picture is far from an aberration. Returns are concentrated in a handful of big winners. With far less drama, this has been the case for our holdings in both Amazon and Tencent over the past decade. Tesla's success has been earned over a period of ownership extending back to 2013 and, as with most successful investments, we have endured large drawdowns in its stock price on the way to the current position.

Tesla has made significant operational progress. It has successfully added capacity and the production ramp of its latest model has progressed far more smoothly than for any of its previous vehicles. Demand for its products is strong and the response from its traditional competitors remains muted. It is still our largest holding even though we sold over 40% of our shares during the period (raising £1.18bn) to ensure that the portfolio has an appropriate level of diversification.

This picture of strong execution and greater clarity on the investment case is shared by a number of the portfolio's other significant winners. Wayfair, the furniture retailer, has benefited from a surge in demand as people have spent

more time at home and invested in upgrading their living environment. Whilst this may be a temporary, Covid-related phenomenon, the company has also moved decisively into profitability after an extended investment phase. The long-term profitability of Wayfair's business model has been hotly debated and the demonstration of a clear ability to make money is much more important for the company's value than a temporary spike in demand.

Food delivery companies Meituan and Delivery Hero have also answered important questions about their future. The former has grown beyond its nearest rival to become the dominant food delivery company in China. The impact of Covid has been to drive up demand for its other delivery services such as grocery and general merchandise. The addressable market in meal delivery is many times larger than Meituan's business today and we now must also factor in the possibility of success in these other categories. Delivery Hero has restructured the geography of its business and now dominates many of the world's most attractive growth markets. Local scale is an important determinant of success and is also allowing Delivery Hero to expand from delivering meals into other delivery services.

The examples of Wayfair, Delivery Hero and Meituan serve to illustrate the growing number of opportunities we have to invest in digital businesses of scale beyond the giant western platforms. This becomes more important as our views on the platform companies are less differentiated than was once the case. In the period, we sold the remaining holding in Facebook and made the first reduction to our Amazon holding that was not driven by diversification concerns. Whilst we have huge respect for Amazon's vision and ability to execute, its starting capitalisation of over \$1.5 trillion makes the path to large future returns more challenging.

The era of electrification that Tesla is helping to materialise will take decades to arrive and have far-reaching consequences. Technological progress is driving down costs along an exponential curve that the fossil fuel industry will be unable to match. It is challenging to predict the impact of such change on the complex system that is the global economy. We eschew prediction and prefer to partner with the entrepreneurs that are driving change. Encouragingly we are seeing more opportunities. Chinese electric vehicle producer, Nio, has endured difficult trading conditions since its IPO in late 2018 but its business is back on track and its balance sheet has been strengthened by continued investment from its founder and through local government support. In the period we invested in Northvolt, a company which will be critical to the creation of European battery manufacturing capacity. Its access to cheap hydroelectric power in Swedish Lapland should give it a cost advantage as the industry grows rapidly. We also made a commitment to ChargePoint, one of the world's largest electric vehicle-charging networks.

Outlook

A clear lesson from this year's events is that we should treat confident pronouncements about the future with scepticism. Rather than engage in such speculation, we prefer to back the companies building the future of our economy with the capital and patience they require. Such opportunities remain plentiful.

The principal risks and uncertainties facing the Company are set out at the end of this document.

5 November 2020

Past performance is not a guide to future performance.

Scottish Mortgage Investment Trust PLC

Responsibility statement

We confirm that to the best of our knowledge:

- a) the condensed set of Financial Statements has been prepared in accordance with FRS 104 'Interim Financial Reporting';
- b) the Interim Management Report includes a fair review of the information required by Disclosure and Transparency Rule 4.2.7R (indication of important events during the first six months, their impact on the condensed set of Financial Statements and a description of the principal risks and uncertainties for the remaining six months of the year); and
- c) the Interim Financial Report includes a fair review of the information required by Disclosure and Transparency Rule 4.2.8R (disclosure of related party transactions and changes therein).

By order of the Board

Fiona McBain

Chair

5 November 2020

Scottish Mortgage Investment Trust PLC

Income statement (unaudited)

Scottish Mortgage Investment Trust PLC

Private Company Investing

Since we began private company investing in 2010, it has increasingly played a more prominent role within the portfolio. A path is emerging, where companies enter the portfolio when private and are held through IPO, when they become publicly listed. It is worth noting that 36.5% of the portfolio at the period end consisted of companies which were private companies at the time of initial purchase. Over the last two years alone, 23 new companies were purchased but only six of these were public at the time of investment. Meantime, a flow of companies has been listing on public markets, recently including the likes of CureVac, Snowflake and Palantir. Over the last five years, those companies that started within the portfolio as private companies, regardless of their status now, contributed 9.6% per annum to shareholder returns. For context, five years ago the total allocation to these companies was a mere 12.9%. In recognition of the contribution being made to shareholder returns, additional performance information on these companies is provided here for shareholders. This will now be done on an annual basis.

Performance of Listed Holdings at 30 September 2020 Held Previously as Private Company Investments From Date of Initial Investment of Each Holding to 30 September 2020

(absolute performance in sterling terms %)

Note: Absolute performance returns cannot be added together as they are geometric.

Notes to the condensed financial statements (unaudited)

1. The condensed Financial Statements for the six months to 30 September 2020 comprise the statements set out in the previous pages together with the related notes below. They have been prepared in accordance with FRS 104 'Interim Financial Reporting' and the AIC's Statement of Recommended Practice issued in November 2014 and updated in October 2019 with consequential amendments. They have not been audited or reviewed by the Auditor pursuant to the Auditing Practices Board Guidance on 'Review of Interim Financial Information'. The Financial Statements for the six months to 30 September 2020 have been prepared on the basis of the same accounting policies as set out in the Company's Annual Report and Financial Statements at 31 March 2020.

Going Concern

The Directors have considered the nature of the Company's assets, its liabilities, projected income and expenditure together with its investment objective and policy, dividend policy and principal risks and uncertainties, as set out at the end of this document. The Board has, in particular, considered the impact of heightened market volatility since the coronavirus outbreak but does not believe the Company's going concern status is affected. The Company's assets, the majority of which are in quoted securities which are readily realisable, exceed its liabilities significantly. All borrowings require the prior approval of the Board. Gearing levels and compliance with borrowing covenants are reviewed by the Board on a regular basis. The Company has continued to comply with the investment trust status requirements of section 1158 of the Corporation Tax Act 2010 and the Investment Trust (Approved Company) Regulations 2011. Accordingly, the Directors considered it appropriate to adopt the going concern basis of accounting in preparing these Financial Statements and confirm that they are not aware of any material uncertainties which may affect the Company's ability to continue in operational existence for a period of at least twelve months from the date of approval of these Financial Statements.

2. The financial information contained within this Interim Financial Report does not constitute statutory accounts as defined in sections 424 to 436 of the Companies Act 2006. The financial information for the year ended 31 March 2020 has been extracted from the statutory accounts which have been filed with the Registrar of Companies. The Auditor Report on those accounts was not qualified, did not include a reference to any matter to which the Auditor drew attention by way of emphasis without qualifying its report and did not contain statements under sections 498 (2) or (3) of the Companies Act 2006.
3. Baillie Gifford & Co Limited, a wholly owned subsidiary of Baillie Gifford & Co, has been appointed by the Company as its Alternative Investment Fund Manager (AIFM) and Company Secretary. The investment management function has been delegated to Baillie Gifford & Co. The management agreement can be terminated on six months' notice. The annual management fee is 0.30% on the first £4 billion of total assets less current liabilities (excluding short term borrowings for investment purposes) and 0.25% thereafter, calculated and payable quarterly.

4. Net return per ordinary share	Six months to 30 September 2020 £'000	Six months to 30 September 2019 £'000
Revenue return on ordinary activities after taxation	6,993	16,312
Capital return on ordinary activities after taxation	6,348,467	252,235
Total net return	6,355,460	268,547
Weighted average number of ordinary shares in issue	1,464,928,674	1,482,684,432

Net return per ordinary share figures are based on the above totals of revenue and capital and the weighted average number of ordinary shares in issue during each period.

There are no dilutive or potentially dilutive shares in issue.

Scottish Mortgage Investment Trust PLC

Notes to the condensed financial statements (unaudited) (ctd)

5. Dividends	Six months to 30 September 2020 £'000	Six months to 30 September 2019 £'000
Amounts recognised as distributions in the period:		
Previous year's final dividend of 1.86p (2019 – 1.74p), paid 1 July 2020	27,306	25,797
	27,306	25,797
Dividends proposed in the period:		
Interim dividend for the year ending 31 March 2021 of 1.45p (2020 – 1.39p)	21,167	20,638
	21,167	20,638

The interim dividend was declared after the period end date and has therefore not been included as a liability in the Balance Sheet. It is payable on 4 December 2020 to shareholders on the register at the close of business on 20 November 2020. The ex-dividend date is 19 November 2020. The Company's Registrars offer a Dividend Reinvestment Plan and the final date for elections for this dividend is 23 November 2020.

6. Fair Value

The fair value hierarchy used to analyse the basis on which the fair values of financial instruments held at fair value through the profit and loss account are measured is described below. Fair value measurements are categorised on the basis of the lowest level input that is significant to the fair value measurement.

Level 1 – using unadjusted quoted prices for identical instruments in an active market;

Level 2 – using inputs, other than quoted prices included within Level 1, that are directly or indirectly observable (based on market data); and

Level 3 – using inputs that are unobservable (for which market data is unavailable).

The Company's investments are financial assets designated at fair value through profit or loss. An analysis of the Company's financial asset investments based on the fair value hierarchy described above is shown below.

Investments held at fair value through profit or loss

	Level 1 £'000	Level 2 £'000	Level 3 £'000	Total £'000
As at 30 September 2020				
Equities/funds	12,783,463	-	-	12,783,463
Unlisted ordinary shares	-	-	439,020	439,020
Unlisted preference shares	-	-	2,197,743	2,197,473
Unlisted convertible note	-	-	16,180	16,180
Total financial asset investments	12,783,463	-	2,652,943	15,436,406
As at 31 March 2020 (audited)				
Equities/funds	7,238,048	-	-	7,238,048
Unlisted ordinary shares	-	-	302,049	302,049
Unlisted preference shares	-	-	1,518,821	1,518,821
Unlisted convertible notes	-	-	20,732	20,732
Total financial asset investments	7,238,048	-	1,841,602	9,079,650

Notes to the condensed financial statements (unaudited) (ctd)

During the period, investments with a book cost of £59,323,000 were transferred from Level 3 to Level 1 on becoming listed. The fair value of listed investments is bid value or, in the case of holdings on certain recognised overseas exchanges, last traded price. Listed Investments are categorised as Level 1 if they are valued using unadjusted quoted prices for identical instruments in an active market and as Level 2 if they do not meet all these criteria but are, nonetheless, valued using market data.

Unlisted Investments

The Company's holdings in unlisted investments are categorised as Level 3. Unlisted investments are valued at fair value by the Directors following a detailed review and appropriate challenge of the valuations proposed by the Managers. The Managers' unlisted investment policy applies techniques consistent with the International Private Equity and Venture Capital Valuation Guidelines 2018 ('IPEV'). The techniques applied are predominantly market-based approaches. The market-based approaches available under IPEV are set out below and are followed by an explanation of how they are applied in the Company's unlisted portfolio:

- Multiples;
- Industry Valuation Benchmarks; and
- Available Market Prices.

The nature of the unlisted portfolio will influence the valuation technique applied. The valuation approach recognises that, as stated in the IPEV Guidelines, the price of a recent investment, if resulting from an orderly transaction, generally represents fair value as at the transaction date and may be an appropriate starting point for estimating fair value at subsequent measurement dates. However, consideration is given to the facts and circumstances as at the subsequent measurement date, including changes in the market or performance of the investee company. Milestone analysis is used where appropriate to incorporate the operational progress of the investee company into the valuation. Additionally, the background to the transaction must be considered. As a result, various multiples-based techniques are employed to assess the valuations particularly in those companies with established revenues. Discounted cashflows are used where appropriate. An absence of relevant industry peers may preclude the application of the Industry Valuation Benchmarks technique and an absence of observable prices may preclude the Available Market Prices approach. All valuations are cross-checked for reasonableness by employing relevant alternative techniques.

The unlisted investments are valued according to a three monthly cycle of measurement dates. The fair value of the unlisted investments will be reviewed before the next scheduled three monthly measurement date on the following occasions:

- At the year end and half year end of the Company; and
- Where there is an indication of a change in fair value as defined in the IPEV guidelines (commonly referred to as 'trigger' events).

7. The total value of the borrowings (at book) is £895,428,000 (31 March 2020 - £906,775,000).

The bank loans falling due within one year are a US\$200 million revolving 3 year loan with National Australia Bank Limited ('NAB'), a US\$80 million revolving 3 year loan with The Royal Bank of Scotland International Limited ('RBS') and a US\$85 million revolving 2 year loan with RBS (31 March 2020 - US\$200 million revolving 2 year loan with NAB, a US\$80 million revolving 3 year loan with RBS and a US\$85 million revolving 2 year loan with RBS).

During the period, further to an arrangement made in 2017, a £20 million 3.65% unsecured loan note maturing in 2044 was issued to finance the redemption of the £20 million 8-14% stepped interest debenture that matured on 30 September 2020.

On 21 April 2020, the US\$200 million 2 year revolving credit facility with NAB was refinanced with at US\$200 million 3 year revolving credit facility with NAB.

There were no bank loans falling due in more than one year (31 March 2020 - none).

8. The fair value of the borrowings at 30 September 2020 was £1,009,936,000 (31 March 2020 - £930,473,000).

Notes to the condensed financial statements (unaudited) (ctd)

9.	At 30 September 2020 Number of shares	31 March 2020 (audited) Number of shares
Share capital: Ordinary shares of 5p each		
Allotted, called up and fully paid	1,459,765,760	1,453,259,808

In the six months to 30 September 2020, the Company sold 24,175,000 ordinary shares from treasury with a nominal value of £1,209,000 at a premium to net asset value raising net proceeds of £186,847,000 (year to 31 March 2020 – issued 10,525,000 ordinary shares, with a nominal value of £526,000, at a premium to net asset value, raising net proceeds of £54,478,000).

In the six months to 30 September 2020, 17,669,048 ordinary shares with a nominal value of £883,000 were bought back at a total cost of £164,564,000 and held in treasury (year to 31 March 2020 – 31,521,072 shares with a nominal value of £1,576,000 were bought back at a total cost of £166,738,000 and held in treasury). At 30 September 2020 the Company had authority remaining to buy back 201,214,437 ordinary shares.

10. Transaction costs on acquisitions within the portfolio amounted to 1,364,000 (30 September 2019 -nil) and transaction costs on sales amounted to £88,000 (30 September 2019 - £133,000). These costs are included in the book cost of acquisitions and in the net proceeds of disposals.

11. Subsequent Events

Unlisted Investments

On 26 October the fair valuation of Ant International Limited was increased to £353,139,000 (an increase of £66,690,000 from the fair valuation at 30 September 2020) following the announcement of the opening listing price for its upcoming initial public offering (IPO).

12. Related Party Transactions

There have been no transactions with related parties during the first six months of the current financial year that have materially affected the financial position or the performance of the Company during that period and there have been no changes in the related party transactions described in the last Annual Report and Financial Statements that could have had such an effect on the Company during that period.

Glossary of Terms and Alternative Performance Measures (APM)

Total Assets

Total assets less current liabilities, before deduction of all borrowings.

Net Asset Value

Also described as shareholders' funds. Net Asset Value (NAV) is the value of total assets less liabilities (including borrowings). Net Asset Value is calculated on the basis of borrowings stated at book value or fair value. An explanation of each is provided below. The NAV per share is calculated by dividing this amount by the number of ordinary shares in issue (excluding treasury shares).

Net Asset Value (Borrowings at Book)/Shareholders' Funds

Borrowings are valued at adjusted net issue proceeds. The value of the borrowings at book is set out in note 7 above.

Net Asset Value (Borrowings at Fair Value) (APM)

Borrowings are valued at an estimate of their market worth. The value of the borrowings at fair is set out in note 8 above and a reconciliation to Net Asset Value with borrowings at book value is provided below.

	30 September 2020	31 March 2020
Net Asset Value per ordinary share (borrowings at book value)	999.8p	567.3p
Shareholders' funds (borrowings at book value)	£14,595,071k	£8,244,634k
Add: book value of borrowings	£895,428k	£906,775k
Less: fair value of borrowings	(£1,009,936k)	(£930,473k)
Net Asset Value (borrowings at fair value)	£14,480,563k	£8,220,936k
Shares in issue at year end (excluding treasury shares)	1,459,765,760	1,453,259,808
Net Asset Value per ordinary share (borrowings at fair value)	992.0p	565.7p

Net Liquid Assets

Net liquid assets comprise current assets less current liabilities (excluding borrowings).

Discount/Premium (APM)

As stockmarkets and share prices vary, an investment trust's share price is rarely the same as its NAV. When the share price is lower than the NAV per share it is said to be trading at a discount. The size of the discount is calculated by subtracting the share price from the NAV per share and is usually expressed as a percentage of the NAV per share. If the share price is higher than the NAV per share, it is said to be trading at a premium.

Gearing (APM)

At its simplest, gearing is borrowing. Just like any other public company, an investment trust can borrow money to invest in additional investments for its portfolio. The effect of the borrowing on the shareholders' assets is called 'gearing'. If the Company's assets grow, the shareholders' assets grow proportionately more because the debt remains the same, but if the value of the Company's assets falls, the situation is reversed. Gearing can therefore enhance performance in rising markets but can adversely impact performance in falling markets.

Gearing represents borrowings at book value less cash and cash equivalents (including any outstanding trade settlements) expressed as a percentage of shareholders' funds.

Turnover (APM)

Annual turnover is calculated by dividing the lower of purchases and sales by the average of opening and closing total assets.

Active Share (APM)

Active share, a measure of how actively a portfolio is managed, is the percentage of the portfolio that differs from its comparative index. It is calculated by deducting from 100 the percentage of the portfolio that overlaps with the comparative index. An active share of 100 indicates no overlap with the index and an active share of zero indicates a portfolio that tracks the index.

Total Return (APM)

The total return is the return to shareholders after reinvesting the net dividend on the date that the share price goes ex-dividend.

Scottish Mortgage Investment Trust PLC

		30 September 2020			30 September 2019		
		NAV (book)	NAV (fair)	Share price	NAV (book)	NAV (fair)	Share price
Closing NAV per share/share price	(a)	999.8p	992.0p	991.0p	520.4p	515.1p	503.5p
Dividend adjustment factor*	(b)	1.0026	1.0025	1.0023	1.0033	1.0033	1.0036
Adjusted closing NAV per share/share price	(c = a x b)	1002.4p	994.5p	993.3p	522.1p	516.8p	505.3p
Opening NAV per share/share price	(d)	567.3p	565.7p	573.5p	504.0p	500.8p	512.0p
Total return	(c ÷ d) - 1	76.7%	75.8%	73.2%	3.6%	3.2%	(1.3%)

* The dividend adjustment factor is calculated on the assumption that the final dividend of 1.86p (2019 – 1.74p) paid by the Company during the period was reinvested into shares of the Company at the cum income NAV per share/share price, as appropriate, at the ex-dividend date.

Principal Risks and Uncertainties

The principal risks facing the Company are financial risk, unlisted investments risk, investment strategy risk, discount risk, regulatory risk, custody and depositary risk, operational risk, leverage risk and political risk. An explanation of these risks and how they are managed is set out on pages 9 and 10 of the Company's Annual Report and Financial Statements for the year to 31 March 2020 which is available on the Company's website: www.scottishmortgageit.com. ‡ The principal risks and uncertainties have not changed since the date of that report with the exception of the ongoing situation regarding Covid-19.

The Board and Managers continue to review the portfolio for the potential impact of the pandemic. The business continuity arrangements of the Managers and other third party service providers have proven robust with operations continuing largely as normal.

Shareholders will be notified on or around 20 November 2020 that the Interim Financial Report has been published and will be available on the Scottish Mortgage page of the Managers' website www.scottishmortgageit.com. ‡

None of the views expressed in this document should be construed as advice to buy or sell a particular investment.

Scottish Mortgage Investment Trust PLC is an actively managed, low cost investment trust, investing in a concentrated global portfolio of companies with the aim of maximising its total return over the long term. It looks for strong businesses with above-average returns and aims to achieve a greater return than the FTSE All-World Index (in sterling terms) over a five year rolling period.

You can find up to date performance information about Scottish Mortgage on the Scottish Mortgage page of the Managers' website at www.scottishmortgageit.com ‡

‡ Neither the contents of the Managers' website nor the contents of any website accessible from hyperlinks on the Managers' website (or any other website) is incorporated into, or forms part of, this announcement.

Scottish Mortgage is managed by Baillie Gifford & Co, the Edinburgh based fund management group with over £296 billion under management and advice in active equity and bond portfolios for clients in the UK and throughout the world (as at 5 November 2020).

Investment Trusts are UK public limited companies and are not authorised or regulated by the Financial Conduct Authority.

Past performance is not a guide to future performance. The value of an investment and any income from it is not guaranteed and may go down as well as up and investors may not get back the amount invested. This is because the share price is determined by the changing conditions in the relevant stock markets in which the Company invests and by the supply and demand for the Company's shares.

Automatic Exchange of Information

In order to fulfil its obligations under UK tax legislation relating to the automatic exchange of information, Scottish Mortgage Investment Trust PLC is required to collect and report certain information about certain shareholders.

The legislation requires investment trust companies to provide personal information to HMRC on certain investors who purchase shares in investment trusts. Accordingly, Scottish Mortgage Investment Trust PLC will have to provide information annually to the local tax authority on the tax residencies of a number of non-UK based certificated shareholders and corporate entities. Shareholders, excluding those whose shares are held in CREST, who come on to the share register will be sent a certification form for the purposes of collecting this information.

For further information, please see HMRC's Quick Guide: Automatic Exchange of Information – information for account holders <https://www.gov.uk/government/publications/exchange-of-information-account-holders>.
