About the Company

Baillie Gifford Bond Funds ICVC (Investment Company with Variable Capital) ('the Company') is an umbrella UK Open-Ended Investment Company ('OEIC') under regulation 14 (Authorisation) of the Open-Ended Investment Companies Regulations 2001. An OEIC is a collective investment vehicle in which your funds are pooled with those of other investors and spread across a portfolio of investments, thus reducing risk.

At 31 March 2023, the Company offered five sub-funds and the range may be varied in the future. Each sub-fund is valued on a daily basis. The sub-funds are subject to different charging structures and subscription limits. All shares are single priced. Details of the sub-funds and the share classes are contained in the Prospectus, along with details of the switching facility available between sub-funds. The Prospectus was last revised on 28 April 2023 and the Instrument of Incorporation were last revised on 19 September 2022. Copies of the Prospectus or Instrument of Incorporation can be obtained from Baillie Gifford & Co Limited, the Authorised Corporate Director ('ACD') by contacting Client Relations.

The Company is registered in Great Britain, registered number IC000402, and the address of its Head Office is Calton Square, 1 Greenside Row, Edinburgh EH1 3AN. The operation of the Company is governed by the Financial Conduct Authority's Collective Investment Schemes Sourcebook ('COLL') (the 'Regulations'), its Instrument of Incorporation and its Prospectus.

The Company's shareholders are not liable for its debts beyond the amount subscribed. Each sub-fund is classed as a UK UCITS retail scheme under COLL.

Any comments expressed in this report should not be taken as a recommendation or advice.

Assessment of value for the Sub-Funds

Under COLL 6.6.20R (1), Baillie Gifford & Co Limited, the ACD of the Company, must conduct an assessment at least annually for each UK authorised sub-fund it manages, of whether the payments out of the sub-funds set out in the prospectus are justified in the context of the overall value delivered to shareholders. This assessment of value must, as a minimum, consider seven criteria, namely: quality of service, performance, authorised fund manager costs, economies of scale, comparable market

rates, comparable services and classes of shares. The ACD will issue the statement of value in a separate composite report, performing the assessment across their full range of UK authorised sub-funds. The ACD has chosen a reference date of 31 March and will publish a composite report by 31 July each year. The latest report as at 31 March 2022 is available on the website at www.bailliegifford.com.

Sub-fund Cross-holdings Table

At 31 March 2023 none of the shares in the sub-funds were held by any other sub-funds of the Company.

Baillie Gifford & Co Limited, the Authorised Corporate Director of the OEIC, is wholly owned by Baillie Gifford & Co. We only provide information about our products and do not provide investment advice.

Statement of Authorised Corporate Director's Responsibilities

The Financial Conduct Authority's Collective Investment Schemes Sourcebook ('COLL') requires the Authorised Corporate Director to prepare financial statements for each interim and annual accounting period which give a true and fair view of the financial position of the Company and of its revenue and expenditure and of its net gains and losses on the property of the Company for the period. In preparing the financial statements the Authorised Corporate Director is required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- comply with the disclosure requirements of the Statement of Recommended Practice relating to the Financial Statements of UK Authorised Funds issued in 2014;
- follow generally accepted accounting principles and applicable accounting standards;
- keep proper accounting records which enable it to demonstrate that the financial statements as prepared comply with the above requirements;

- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in operation; and
- take reasonable steps for the prevention and detection of fraud and irregularities.

The Authorised Corporate Director is responsible for the management of the Company in accordance with the Instrument of Incorporation, the Prospectus and the Regulations.

The Interim Report and Financial Statements were approved by the Authorised Corporate Director and signed on its behalf by:

M J C Wylie, Chairman
C M Fraser, Director
Baillie Gifford & Co Limited

BAILLIE GIFFORD

Baillie Gifford Emerging Markets Bond Fund

a sub-fund of Baillie Gifford Bond Funds ICVC

*Interim Report and Financial Statements (Unaudited)
for the six months ended 31 March 2023*

Baillie Gifford Emerging Markets Bond Fund

Investment Objective

The Fund aims to outperform (after deduction of costs) the J.P. Morgan GBI-EM Global Diversified Index unhedged in sterling by 0.6% per annum over rolling three-year periods.

Investment Policy

The Fund will invest at least 80% in bonds issued by emerging market issuers or in emerging market currencies. Emerging markets will be determined by the investment manager at its discretion. The Fund may also invest in other bonds including developed market bonds. Currency forwards and derivatives, which are types of financial contracts, are used for both investment purposes and in the management of risk. The Fund will be exposed to foreign currencies. The Fund will be actively managed and is not constrained by the index.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Market conditions can change rapidly and a fund in any rank can lose you your investment. The Fund is classified as above as it invests in government bonds issued by emerging market borrowers.

The indicator does not take into account the following relevant material risks.

Bonds are affected by interest rates and inflation trends which may affect the value of the Fund. They could lose value if the issuer's financial health deteriorates.

Derivatives can magnify losses if returns go down.

In adverse market conditions it may be difficult to sell investments held by the fund in a timely manner and their value may fall significantly. This could affect how much money you receive and even delay the selling of your shares if dealing in the Fund is suspended.

Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care.

You could lose your investment due to global factors like natural disasters, pandemics, or through developments such as military conflict, or changes in government policies.

Expenses are taken from the Fund's capital. This will reduce the capital value of the Fund.

For a more detailed explanation of the risks, please see the "Risk Warnings" section of the prospectus.

Fees Allocated to Capital

For distribution purposes all expenses (including the Annual Management Charge) as represented by the OCF will be allocated to capital. This will reduce the capital value of the Fund.

Investment Report

Past Performance

The performance figures shown in this graph are for Class B Income Shares. Performance figures reflect the ACD's annual fee of 0.4% (until 1 July 2018 the ACD's annual fee on Class B Shares was 0.6%), but exclude any initial charge paid. Performance figures for the other share classes in issue can be obtained by contacting Client Relations. You should be aware that past performance is not a guide to future performance.

Past Performance

The investment objective of the Fund is to outperform (after deduction of costs) the J.P. Morgan GBI-EM Global Diversified Index unhedged in sterling (the 'Index') by 0.6% per annum (the 'target return') over rolling three-year periods. For the six months to 31 March 2023 the return on B Income Shares was 3.0%³, compared to the Index of 3.0%² and the target return of 3.3%². We believe that short-term performance measurements are of limited relevance in assessing investment ability and would suggest that three years is a more sensible timeframe over which to judge performance, a period in-line with the Fund's objectives. Over that period, the annualised return on B Income Shares was 2.6%³ compared to the Index of 1.0%² and the target return of 1.6%².

Market Environment

Financial markets have oscillated in wide ranges for much of the last six months, and central banks have shown a commitment to bring inflation rates down by

continuing to raise interest rates, including in the US. The global economy is delicately poised as policymakers strive to bring inflation back towards target levels while avoiding a deep recession – in other words, to engineer a 'soft landing' of the economy.

At this stage, our base case is that emerging market economies will not be at the epicentre of any looming recession, however any slowdown in developed markets will have knock-on effects. These will vary between emerging market countries, yet these economies are experienced in coping with rapid tightening in financial conditions during short periods. Many of these countries have raised interest rates significantly during the past two years, which means there is scope for monetary policy to loosen if economic growth deteriorates. This room for manoeuvre in emerging markets has helped their local currency bonds to outperform developed market bonds during recent periods of volatility in markets.

A slowdown in economic growth should lead to reduced inflationary pressures in emerging market economies, which were already showing early signs of

¹Source: FE, 10am dealing prices, income reinvested, after charges. ²Source: StatPro and J.P. Morgan, total return. The target return outperformance is compounded daily therefore the Index return plus the outperformance will not equal the target return. Please see Disclaimer on page 90. ³Source: Baillie Gifford & Co Limited, 10am dealing prices, income reinvested, after charges. You should be aware that past performance is not a guide to future performance.

Investment Report cont.

cooling. These views on the growth and inflation outlook are reflected in the Fund's duration position, which continues to be longer than the benchmark index.

Performance

The Fund performed strongly in absolute terms during this six-month period, albeit returns were in line with the Index. The Fund benefited from its overweight allocation to various Latin American countries, such as Peru and Chile, where bond prices strengthened as economic data showed signs of inflation slowing.

The Fund's longer duration position also made a positive contribution to returns compared with the index, as we saw early signs of inflation decelerating. This reflects our view that increases in emerging market interest rates are largely behind us. Indeed, there is scope for monetary policy to loosen – particularly if growth or inflation soften during the remainder of this year.

Active currency returns were mixed. Highlights included the overweight allocation to the Mexican peso, which continued to appreciate against the US dollar. Mexico's currency is benefitting from US companies engaging in 'nearshoring' (bringing production back to countries nearby) to shorten their supply chains. The Fund's underweight allocations to Polish zloty and Hungarian forint detracted from returns, as both currencies rallied sharply.

Following a prolonged period of challenging returns for local currency emerging market bonds, we believe the current backdrop leaves the Fund well positioned to deliver its objectives and provide attractive total returns, including an attractive income stream, during the coming years.

Positioning

We increased the Fund's duration modestly in late 2022, as we became more confident that inflationary pressures were beginning to ease in many markets. This has started to come through in economic data.

In terms of country positioning, the three largest overweight positions continue to be Brazil, Uruguay and Peru. We remain positive on the prospects for many Latin American sovereign bonds, based on our expectation that real yields will fall (and prices rise) across the region. Conversely, negative real yields persist across parts of Asia and Eastern Europe, with key underweights including Thailand, Malaysia and Poland.

As regards currencies, we are somewhat positive on the prospects for emerging market currencies overall. The most significant change to the Fund's currency exposure during the period was in relation to the US dollar, where we closed our overweight position during the fourth quarter of 2022. The Fund now has a net short position in the US dollar, reflecting our view that the recent period of US exceptionalism is less likely to persist.

You should be aware that past performance is not a guide to future performance.

¹The Synthetic Risk and Reward Indicator demonstrates where the Fund ranks in terms of its potential risk and reward on a scale from 1 (lowest) to 7 (highest). The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. Further information is included in the Risk and Reward Profile section of the Fund's interim report.

²The Ongoing Charges Figure is based on the expenses for the financial period and may vary from year to year. It excludes the cost of buying and selling assets for the Fund although custodian transaction costs are included. For further details on the costs associated with investing in the Fund please see the Enhanced Disclosure of Fund Costs and Charges document and Baillie Gifford's Funds Costs and Charges Summary, both of which are available on the website www.bailliegifford.com.

³As at 30 September 2020, the ACD considered 1.22% to be more indicative rate for the ongoing charges figure for Class A Shares.

⁴As at 30 September 2021 the ACD considered 0.53% to be more indicative rate for the ongoing charges figure for Class B Shares.

⁵As at 30 September 2020, the ACD considered 0.52% to be a more indicative rate for the ongoing charges figure for Class B Shares.

Basis for preparation

The interim financial statements have been prepared in accordance with the Statement of Recommended Practice for UK Authorised Funds issued by the Investment Management Association in May 2014.

The accounting policies applied are consistent with those in the annual financial statements for the year ended 30 September 2022 and are described in those annual financial statements.

BAILLIE GIFFORD

Baillie Gifford High Yield Bond Fund

a sub-fund of Baillie Gifford Bond Funds ICVC

*Interim Report and Financial Statements (Unaudited)
for the six months ended 31 March 2023*

Baillie Gifford High Yield Bond Fund

Investment Objective

The Fund aims to produce a combination of income and capital growth.

Investment Policy

The Fund will invest at least 80% in sub-investment grade bonds. The Fund may also invest in other bonds. The bonds in which the Fund invests will be denominated in sterling or denominated in other currencies and hedged back to sterling. Currency forwards and derivatives, which are types of financial contracts, are used for both investment purposes and in the management of risk. The Fund will be actively managed.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Market conditions can change rapidly and a fund in any rank can lose you your investment. The Fund is classified as above as it invests in corporate bonds.

The indicator does not take into account the following relevant material risks.

Bonds are affected by interest rates and inflation trends which may affect the value of the Fund. They could lose value if the issuer's financial health deteriorates.

Derivatives can magnify losses if returns go down.

In adverse market conditions it may be difficult to sell investments held by the fund in a timely manner and their value may fall significantly. This could affect how much money you receive and even delay the selling of your shares if dealing in the Fund is suspended.

Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care.

You could lose your investment due to global factors like natural disasters, pandemics, or through developments such as military conflict, or changes in government policies.

Expenses are taken from the Fund's capital. This will reduce the capital value of the Fund.

For a more detailed explanation of the risks, please see the "Risk Warnings" section of the prospectus.

Fees Allocated to Capital

For distribution purposes all expenses (including the Annual Management Charge) as represented by the OCF will be allocated to capital. This will reduce the capital value of the Fund.

Investment Report

Past Performance

The performance figures shown in this graph are for Class B Income Shares. Performance figures reflect the ACD's annual fee of 0.35%, but exclude any initial charge paid. Performance figures for the other share classes in issue can be obtained by contacting Client Relations. You should be aware that past performance is not a guide to future performance.

Past Performance

The investment objective of the Fund is to produce a combination of income and capital growth. For the six months to 31 March 2023 income totalling 2.5 pence per share was declared for B Income Shares and the total return was 5.7%³. The capital return in the period was 3.3%⁴. We believe that short-term performance measurements are of limited relevance in assessing investment ability and would suggest that three years is a more sensible timeframe over which to judge performance, a period in-line with the Fund's objectives. Over that period, income totalling 17.91 pence per share was declared for B Income Shares and the annualised total return was 2.8%³. The annualised capital return was -2.0%⁴. It is disappointing that over this period the Fund has not met its capital growth objective.

Market Environment

Despite significant volatility, corporate bond markets have recovered in the past six months following the significant price falls seen earlier in 2022. While the

outlook remains uncertain, inflation has started to stabilise in America and the US Federal Reserve has begun to slow the pace of interest rate hikes in response. Confidence was also boosted as China emerged from its Zero-Covid strategy and unseasonably warm weather for much of the northern hemisphere supported growth.

While the overall trajectory has been positive, financial markets have oscillated in wide ranges for much of the period. Liz Truss' mini-budget, new inflation prints and instability in the banking sector have driven volatility. Throughout, central banks have remained committed to bringing inflation back to target levels. This will likely require an erosion of corporate pricing power and reduced profit margins. The longer we fail to see evidence of this, the higher interest rates will be and, therefore, the risk of 'something breaking' and the economy falling into recession increases. This would lead to a deeper earnings recession, which market pricing does not yet reflect.

You should be aware that past performance is not a guide to future performance.

Investment Report cont.

Performance

The Fund underperformed over the last six months. This was primarily driven by bond selection where the largest single detractor was the Fund's holding in SVB Financials' preferred bonds. We sold these bonds as soon as it became clear that unsecured debtholders would not be protected following the collapse of the bank. This position cost the Fund circa 1.0%. While defaults are an inevitable part of investing in high yield bonds, we strive to avoid them through our in-depth fundamental research process, which seeks to identify resilient companies.

The investment thesis for SVB Financial was based on its domination of the highly profitable niche of commercial banking to venture capital (VC) firms, their funds and VC-backed portfolio companies. Ultimately, the bank did not collapse as a result of poor underwriting. This was an exceptional event triggered by panic across its relatively concentrated deposit base, which we believe was hard to predict. However, we continue to assess our research and decision-making as we reflect on this event to ascertain what lessons we can learn.

Over three years the Fund has also underperformed its comparator benchmark. The annualised total return on the comparator benchmark was 5.3%¹. This reflects a number of factors, including bond selection, the longer-duration nature of our approach, which detracted as interest rate expectations rose sharply in 2022, and our decision to reduce exposure to Covid-19 impacted sectors in advance of the announcement of vaccine success in November 2020.

Positioning

Given the uncertain macroeconomic outlook, we have taken a number of actions to reduce portfolio risk over the last six months. We are bearish on the economic outlook for the United Kingdom and conscious that the uncertain path of monetary policy may put pressure on corporate balance sheets and create further volatility in the hybrid bond market. This led us to sell holdings in perpetual bonds issued by Indian telco Bharti Airtel and

European hotel group Accor at attractive valuations. In addition, we sold out of holdings in British bar and restaurant owner Mitchells & Butlers and retailer Marks and Spencer. Finally, we have reduced exposure to other cyclical sectors including real estate and financial services while adding to more resilient sectors such as healthcare, telecommunications and services.

New buys this period also focused on bringing further diversification to the portfolio. For example, we added bonds issued by Aggreko and Nielsen which have differentiated business models relative to other holdings. Aggreko is a global business providing energy solutions that we believe will benefit from urbanisation in emerging markets. Senior secured US dollar bonds issued by American information, data and market measurement firm Nielsen are attractively valued. While Nielsen is highly levered, we are attracted to its high-margin, cash-generative core business, which has effectively adapted to structural change. Overall, recent events illustrate that the rapid tightening of financial conditions seen in 2022 has increased the potential for pockets of stress to emerge. As such, we continue to focus on assessing the resilience of individual bonds held by the Fund.

You should be aware that past performance is not a guide to future performance.

¹The Synthetic Risk and Reward Indicator demonstrates where the Fund ranks in terms of its potential risk and reward on a scale from 1 (lowest) to 7 (highest). The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. Further information is included in the Risk and Reward Profile section of the Fund's interim report.

²The Ongoing Charges Figure is based on the expenses for the financial period and may vary from year to year. It excludes the cost of buying and selling assets for the Fund although custodian transaction costs are included. For further details on the costs associated with investing in the Fund please see the Enhanced Disclosure of Fund Costs and Charges document and Baillie Gifford's Funds Costs and Charges Summary, both of which are available on the website www.bailliegifford.com.

Basis for preparation

The interim financial statements have been prepared in accordance with the Statement of Recommended Practice for UK Authorised Funds issued by the Investment Management Association in May 2014.

The accounting policies applied are consistent with those in the annual financial statements for the year ended 30 September 2022 and are described in those annual financial statements.

BAILLIE GIFFORD

Baillie Gifford Investment Grade Bond Fund

a sub-fund of Baillie Gifford Bond Funds ICVC

*Interim Report and Financial Statements (Unaudited)
for the six months ended 31 March 2023*

Baillie Gifford Investment Grade Bond Fund

Investment Objective

The Fund aims to outperform (after deduction of costs) the ICE BofA Sterling Non-Gilt Index by 0.75% per annum over rolling three-year periods.

Investment Policy

The Fund will invest at least 80% in investment grade bonds issued by corporate issuers, public bodies and supranationals. The Fund may also invest in other bonds including sub-investment grade bonds and government bonds. The bonds in which the Fund invests will be denominated in sterling or denominated in other currencies and hedged back to sterling. Currency forwards and derivatives, which are types of financial contracts, are used for both investment purposes and in the management of risk. The Fund will be actively managed and is not constrained by the index.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Market conditions can change rapidly and a fund in any rank can lose you your investment. The Fund is classified as above as it invests in corporate bonds.

The indicator does not take into account the following relevant material risks.

Bonds are affected by interest rates and inflation trends which may affect the value of the Fund. They could lose value if the issuer's financial health deteriorates.

Derivatives can magnify losses if returns go down.

In adverse market conditions it may be difficult to sell investments held by the fund in a timely manner and their value may fall significantly. This could affect how much money you receive and even delay the selling of your shares if dealing in the Fund is suspended.

Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care.

You could lose your investment due to global factors like natural disasters, pandemics, or through developments such as military conflict, or changes in government policies.

Expenses are taken from the Fund's capital. This will reduce the capital value of the Fund.

For a more detailed explanation of the risks, please see the "Risk Warnings" section of the prospectus.

Fees Allocated to Capital

For distribution purposes all expenses (including the Annual Management Charge) as represented by the OCF will be allocated to capital. This will reduce the capital value of the Fund.

Investment Report

Past Performance

The performance figures shown in this graph are for Class B Income Shares. Performance figures reflect the ACD's annual fee of 0.25%, but exclude any initial charge paid. Performance figures for the other share classes in issue can be obtained by contacting Client Relations. You should be aware that past performance is not a guide to future performance.

Past Performance

The investment objective of the Fund is to outperform (after deduction of costs) the ICE BofA Sterling Non-Gilt Index (the 'Index') by 0.5% per annum to 18 September 2022, then by 0.75% per annum thereafter (the 'target return') over rolling three-year periods. For the six months to 31 March 2023 the return on B Income Shares was 8.1%³ compared to the Index of 8.7%² and the target return of 9.1%². We believe that short-term performance measurements are of limited relevance in assessing investment ability and would suggest that three years is a more sensible timeframe over which to judge performance, a period in-line with the Fund's objectives. Over that period, the annualised return on B Income Shares was -2.8%³ compared to the Index of -3.1%² and the target return of -2.5%².

Market Environment

Despite continued volatility, corporate bond markets have recovered in the past six months following the significant price falls seen earlier in 2022. While the

outlook remains uncertain, inflation has started to stabilise in America and the US Federal Reserve has begun to slow the pace of interest rate hikes in response. Confidence was also boosted as China emerged from its Zero-Covid strategy and unseasonably warm weather for much of the northern hemisphere supported growth.

While the overall trajectory has been positive, financial markets have oscillated in wide ranges for much of the period. Liz Truss' mini-budget, new inflation prints and instability in the banking sector have driven volatility. Throughout, central banks have remained committed to bringing inflation back to target levels. This will likely require an erosion of corporate pricing power and reduced profit margins. The longer we fail to see evidence of this, the higher interest rates will be and, therefore, the risk of 'something breaking' and the economy falling into recession increases. This would lead to a deeper earnings recession, which market pricing does not yet reflect.

¹Source: FE, 10am dealing prices, income reinvested, after charges. ²Source: StatPro and ICE, total return. The target return outperformance is compounded daily therefore the Index return plus the outperformance will not equal the target return. Please see Disclaimer on page 90. ³Source: Baillie Gifford & Co Limited, 10am dealing prices, income reinvested, after charges. You should be aware that past performance is not a guide to future performance.

Investment Report cont.

Performance

The Fund has lagged its index benchmark in the past six months and this has impacted longer term returns – over three years the Fund has outperformed its index but not met its target. As inflationary pressures have built it is no surprise that monetary policy has been tightening, but the pace and scale of interest rate rises in the past year has been greater than expected. This has disproportionately impacted certain sectors, with real estate companies particularly exposed to slowing growth and higher interest costs. Heimstaden Bostad, a Swedish residential property company, is one example held by the Fund which has been a detractor. The recent issues with Silicon Valley Bank and Credit Suisse have also created volatility in the banking sector, impacting some of the Fund's subordinated bonds. We view this as a short-term overreaction as the banking system remains well capitalised and the Fund lends to very high-quality banks which we believe remain fundamentally sound.

Positioning

The Fund is positioned reasonably defensively as we believe more volatility in corporate bond markets may ensue, with the impact of higher interest rates affecting the real economy. We reduced exposure to the property sector by selling bonds issued by CTP, an Eastern European logistics company, and reducing the aforementioned exposure to Heimstaden Bostad. Towards the end of the period, we added defensive exposure to the Fund with two new issues in the utilities sector in the form of Engie green bonds and Wessex Water Sustainable bonds. Each carries a commitment to use these funds to specifically finance green, social or sustainability projects.

Baillie Gifford & Co, 31 May 2023

You should be aware that past performance is not a guide to future performance.

¹The Synthetic Risk and Reward Indicator demonstrates where the Fund ranks in terms of its potential risk and reward on a scale from 1 (lowest) to 7 (highest). The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. Further information is included in the Risk and Reward Profile section of the Fund's interim report.

²The Ongoing Charges Figure is based on the expenses for the financial period and may vary from year to year. It excludes the cost of buying and selling assets for the Fund although custodian transaction costs are included. For further details on the costs associated with investing in the Fund please see the Enhanced Disclosure of Fund Costs and Charges document and Baillie Gifford's Funds Costs and Charges Summary, both of which are available on the website www.bailliegifford.com.

³As at 30 September 2022, the ACD considered 1.02% to be a more indicative rate for the ongoing charges figure for Class A Shares.

⁴As at 30 September 2020, the ACD considered 1.03% to be a more indicative rate for the ongoing charges figure for Class A Shares.

⁵As at 30 September 2020, the ACD considered 0.03% to be a more indicative rate for the ongoing charges figure for Class C Shares.

Basis for preparation

The interim financial statements have been prepared in accordance with the Statement of Recommended Practice for UK Authorised Funds issued by the Investment Management Association in May 2014.

The accounting policies applied are consistent with those in the annual financial statements for the year ended 30 September 2022 and are described in those annual financial statements.

BAILLIE GIFFORD

Baillie Gifford Investment Grade Long Bond Fund

a sub-fund of Baillie Gifford Bond Funds ICVC

*Interim Report and Financial Statements (Unaudited)
for the six months ended 31 March 2023*

Baillie Gifford Investment Grade Long Bond Fund

Investment Objective

The Fund aims to outperform (after deduction of costs) the ICE BofA Sterling Non-Gilt over 10 Years Index by 0.5% per annum over rolling three-year periods.

Investment Policy

The Fund will invest at least 80% in investment grade bonds issued by corporate issuers, public bodies and supranationals. The Fund may also invest in other bonds including sub-investment grade bonds and government bonds. The bonds in which the Fund invests will be denominated in sterling or denominated in other currencies and hedged back to sterling. Currency forwards and derivatives, which are types of financial contracts, are used for both investment purposes and in the management of risk. The Fund will be actively managed and is not constrained by the index.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Market conditions can change rapidly and a fund in any rank can lose you your investment. The Fund is classified as above as it invests in corporate bonds.

The indicator does not take into account the following relevant material risks.

Bonds are affected by interest rates and inflation trends which may affect the value of the Fund. They could lose value if the issuer's financial health deteriorates.

Derivatives can magnify losses if returns go down.

In adverse market conditions it may be difficult to sell investments held by the fund in a timely manner and their value may fall significantly. This could affect how much money you receive and even delay the selling of your shares if dealing in the Fund is suspended.

Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care.

You could lose your investment due to global factors like natural disasters, pandemics, or through developments such as military conflict, or changes in government policies.

Expenses are taken from the Fund's capital. This will reduce the capital value of the Fund.

For a more detailed explanation of the risks, please see the "Risk Warnings" section of the prospectus.

Fees Allocated to Capital

For distribution purposes all expenses (including the Annual Management Charge) as represented by the OCF will be allocated to capital. This will reduce the capital value of the Fund.

Investment Report

Past Performance

The performance figures shown in this graph are for Class B Income Shares. Performance figures reflect the ACD's annual fee of 0.25%, but exclude any initial charge paid. Performance figures for the other share classes in issue can be obtained by contacting Client Relations. You should be aware that past performance is not a guide to future performance.

Past Performance

The investment objective of the Fund is to outperform (after deduction of costs) the ICE BofA Sterling Non-Gilt over 10 Years Index (the 'Index') by 0.5% per annum (the 'target return') over rolling three-year periods. For the six months to 31 March 2023 the return on B Income Shares was 11.8%³ compared to the Index of 11.9%² and the target return of 12.2%². We believe that short-term performance measurements are of limited relevance in assessing investment ability and would suggest that three years is a more sensible timeframe over which to judge performance, a period in-line with the Fund's objectives. Over that period, the annualised return on B Income Shares was -7.3%³ compared to the return on the Index of -6.8%² and the target return of -6.3%².

Market Environment

Despite continued volatility, corporate bond markets have recovered in the past six months following the significant price falls seen earlier in 2022. While the outlook remains uncertain, inflation has started to

stabilise in America and the US Federal Reserve has begun to slow the pace of interest rate hikes in response. Confidence was also boosted as China emerged from its Zero-Covid strategy and unseasonably warm weather for much of the northern hemisphere supported growth.

While the overall trajectory has been positive, financial markets have oscillated in wide ranges for much of the period. Liz Truss' mini-budget, new inflation prints and instability in the banking sector have driven volatility. Throughout, central banks have remained committed to bringing inflation back to target levels. This will likely require an erosion of corporate pricing power and reduced profit margins. The longer we fail to see evidence of this, the higher interest rates will be and, therefore, the risk of 'something breaking' and the economy falling into recession increases. This would lead to a deeper earnings recession, which market pricing does not yet reflect.

¹Source: FE, 10am dealing prices, income reinvested, after charges. ²Source: StatPro and ICE, total return. The target return outperformance is compounded daily therefore the Index return plus the outperformance will not equal the target return. Please see Disclaimer on page 90. ³Source: Baillie Gifford & Co Limited, 10am dealing prices, income reinvested, after charges. You should be aware that past performance is not a guide to future performance.

Investment Report cont.

Performance

The Fund has lagged its index benchmark in the past six months and over three years. As inflationary pressures have built it is no surprise that monetary policy has been tightening, but the pace and scale of interest rate rises in the past year has been greater than expected. This has disproportionately impacted certain sectors, with real estate companies particularly exposed to slowing growth and higher interest costs. Heimstaden Bostad, a Swedish residential property company, is one example held by the Fund which has been a detractor. The recent issues with Silicon Valley Bank and Credit Suisse have also created volatility in the banking sector, impacting some of the Fund's subordinated bonds. We view this as a short-term overreaction as the banking system remains well capitalised and the Fund lends to very high-quality banks which we believe remain fundamentally sound.

Positioning

The Fund is positioned reasonably defensively as we believe more volatility in corporate bond markets may ensue, with the impact of higher interest rates affecting the real economy. We reduced exposure to the property sector by selling bonds issued by CTP, an Eastern European logistics company, and reducing the aforementioned exposure to Heimstaden Bostad. Towards the end of the period, we added defensive exposure to the Fund with two new issues in the utilities sector in the form of Engie green bonds and Wessex Water Sustainable bonds. Each carries a commitment to use these funds to specifically finance green, social or sustainability projects.

¹The Synthetic Risk and Reward Indicator demonstrates where the Fund ranks in terms of its potential risk and reward on a scale from 1 (lowest) to 7 (highest). The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. Further information is included in the Risk and Reward Profile section of the Fund's interim report.

²The Ongoing Charges Figure is based on the expenses for the financial period and may vary from year to year. It excludes the cost of buying and selling assets for the Fund although custodian transaction costs are included. For further details on the costs associated with investing in the Fund please see the Enhanced Disclosure of Fund Costs and Charges document and Baillie Gifford's Funds Costs and Charges Summary, both of which are available on the website www.bailliegifford.com.

Basis for preparation

The interim financial statements have been prepared in accordance with the Statement of Recommended Practice for UK Authorised Funds issued by the Investment Management Association in May 2014.

The accounting policies applied are consistent with those in the annual financial statements for the year ended 30 September 2022 and are described in those annual financial statements.

BAILLIE GIFFORD

Baillie Gifford Strategic Bond Fund

a sub-fund of Baillie Gifford Bond Funds ICVC

*Interim Report and Financial Statements (Unaudited)
for the six months ended 31 March 2023*

Baillie Gifford Strategic Bond Fund

Investment Objective

The Fund aims to produce monthly income. Opportunities for capital growth are also sought, subject to prevailing market conditions.

Investment Policy

The Fund will invest at least 80% in a diversified portfolio of (1) investment grade and (2) sub-investment grade bonds, issued by corporate issuers, public bodies and supranationals, and (3) developed market government bonds. The fund may also invest in other bonds. The bonds in which the Fund invests will be denominated in sterling or denominated in other currencies and hedged back to sterling. Currency forwards and derivatives, which are types of financial contracts, are used for both investment purposes and in the management of risk. The Fund will be actively managed through bond selection and strategic asset allocation.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Market conditions can change rapidly and a fund in any rank can lose you your investment. The Fund is classified as above as it invests in corporate bonds.

The indicator does not take into account the following relevant material risks.

Bonds are affected by interest rates and inflation trends which may affect the value of the Fund. They could lose value if the issuer's financial health deteriorates.

Derivatives can magnify losses if returns go down.

In adverse market conditions it may be difficult to sell investments held by the fund in a timely manner and their value may fall significantly. This could affect how much money you receive and even delay the selling of your shares if dealing in the Fund is suspended.

Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care.

You could lose your investment due to global factors like natural disasters, pandemics, or through developments such as military conflict, or changes in government policies.

Expenses are taken from the Fund's capital. This will reduce the capital value of the Fund.

For a more detailed explanation of the risks, please see the "Risk Warnings" section of the prospectus.

Fees Allocated to Capital

For distribution purposes all expenses (including the Annual Management Charge) as represented by the OCF will be allocated to capital. This will reduce the capital value of the Fund.

Investment Report

Past Performance

The performance figures shown in this graph are for Class B Income Shares. Performance figures reflect the ACD's annual fee of 0.5%, but exclude any initial charge paid. Performance figures for the other share classes in issue can be obtained by contacting Client Relations. You should be aware that past performance is not a guide to future performance.

Past Performance

The investment objective of the Fund is to produce monthly income. Opportunities for capital growth are also sought, subject to prevailing market conditions. For the six months to 31 March 2023 income totalling 1.24 pence per share was declared for B Income Shares and the total return was 7.6%³ compared to the composite index⁴ ('comparative benchmark') of 8.7%². We believe that short-term performance measurements are of limited relevance in assessing investment ability and would suggest that three years is a more sensible timeframe over which to judge performance, a period in-line with the Fund's objectives. Over that period, income totalling 9.21 pence per share was declared for B Income Shares and the annualised total return was -0.4%³ compared to the comparator benchmark of -0.6%².

Market Environment

Despite recent volatility, corporate bond markets have recovered in the past six months following the significant price falls seen earlier in 2022. While the outlook

remains uncertain, inflation has started to stabilise in America and the US Federal Reserve has begun to slow the pace of interest rate hikes in response. Confidence was also boosted as China emerged from its Zero-Covid strategy and unseasonably warm weather for much of the northern hemisphere supported growth.

While the overall trajectory has been positive, financial markets have oscillated in wide ranges for much of the period. Liz Truss' mini-budget, new inflation prints and instability in the banking sector have driven volatility. Throughout, central banks have remained committed to bringing inflation back to target levels. This will likely require an erosion of corporate pricing power and reduced profit margins. The longer we fail to see evidence of this, the higher interest rates will be and, therefore, the risk of 'something breaking' and the economy falling into recession increases. This would lead to a deeper earnings recession, which market pricing does not yet reflect.

¹Source: FE, 10am dealing prices, income reinvested, after charges. ²Source: StatPro and The Investment Association, total return. Please see Disclaimer on page 90. ³Source: Baillie Gifford & Co Limited, 10am dealing prices, income reinvested, after charges. You should be aware that past performance is not a guide to future performance. ⁴The composite index is comprised of 70%: ICE BofA Sterling Non-Gilt Index and 30%: ICE BofA European Currency High Yield Constrained Index (hedged to GBP).

Investment Report cont.

Performance

In the past 6 months, the Fund underperformed the comparator benchmark. The Fund's exposure to BB and B-rated high yield corporate bonds was additive as credit spreads - the additional yield offered by corporate bonds above government bond yields - tightened. Relative to the comparator benchmark, value added through active credit risk management was offset by bond selection. For example, American primary health care provider Cano Health performed poorly as it was downgraded on concerns around its high leverage. For the moment, we continue to hold as Cano is posting rapid organic growth, and takeover potential remains. In addition, the portfolio's exposure to corporate hybrid bonds detracted from the performance of the Fund due to their higher sensitivity to volatile market conditions. Subordinated hybrid bonds provide an opportunity to access higher yields from companies with resilient characteristics by moving down the capital structure. We believe the higher yields offered by these positions are attractive for the long-term investor, and as such, we are willing to accept the short-term volatility that comes with holding these bonds.

Positioning

Given the uncertain macroeconomic outlook, we started to reduce portfolio credit risk in the first quarter of 2023 as valuations recovered. By the end of March, high yield exposure had fallen from 41% to 26%. This was achieved by reducing positions in high yield and industrial hybrid bonds issued by companies such as French hotel group Accor and Indian telco Bharti Airtel. Complete sales included UK retailer Marks and Spencer, given the continued pressures on the UK consumer. These were replaced with high-quality additions such as A-rated bonds issued by leading Japanese telecommunications company, NTT. We believe this partially state-owned company's strong cash generation and commitment to deleveraging will see the balance sheet glide back to strength over the coming years. We also added low-risk, supranational bonds issued by the European Investment Bank.

During the period, we continued to identify new ideas, including Yara International, a partially state-owned European fertiliser company with a long and successful track record of navigating various commodity cycles. Given expected falls in profitability after a record year in 2022, their bonds offer excellent compensation for the long-term investor as their balance sheet remains robust and resilient enough to withstand short-term pressures. In addition, we purchased senior secured US dollar bonds issued by American information, data and market measurement firm Nielsen. While Nielsen is highly levered, we are attracted to its high-margin, cash-generative core business, which has effectively adapted to structural change.

You should be aware that past performance is not a guide to future performance.

¹The Synthetic Risk and Reward Indicator demonstrates where the Fund ranks in terms of its potential risk and reward on a scale from 1 (lowest) to 7 (highest). The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. Further information is included in the Risk and Reward Profile section of the Fund's interim report.

²The Ongoing Charges Figure is based on the expenses for the financial period and may vary from year to year. It excludes the cost of buying and selling assets for the Fund although custodian transaction costs are included. For further details on the costs associated with investing in the Fund please see the Enhanced Disclosure of Fund Costs and Charges document and Baillie Gifford's Funds Costs and Charges Summary, both of which are available on the website www.bailliegifford.com.

Basis for preparation

The interim financial statements have been prepared in accordance with the Statement of Recommended Practice for UK Authorised Funds issued by the Investment Management Association in May 2014.

The accounting policies applied are consistent with those in the annual financial statements for the year ended 30 September 2022 and are described in those annual financial statements.

General Information

Dilution Adjustment

A sub-fund suffers dilution (reduction) in the value of the Scheme Property attributable to it because the actual costs of buying or selling investments for the sub-fund deviate from the mid-market values generally used in calculating the price of shares in the sub-fund. Such deviation may occur as a result of the costs (which may include dealing charges and taxes) incurred in dealing in such investments and of any spread between the buying and selling prices of such investments. It is not possible to predict accurately whether dilution is likely to occur.

The COLL Rules allow the cost of dilution to be (1) met directly from the Scheme Property attributable to the sub-fund or (2) addressed by the imposition on investors of a dilution levy on the issue by the Company, subscriptions facilitated by the ACD, cancellation by the Company or redemption by the ACD of shares in the sub-fund or (3) dealt with by means of a dilution adjustment, which is the policy which has been adopted by the ACD in relation to the sub-funds of the Company. With a view to mitigating the effects of dilution, the ACD therefore reserves the right at its sole discretion to make a dilution adjustment in the calculation of the dealing price, and thereby swing the dealing price, of shares in any sub-fund of the Company if in its opinion the existing shareholders (for net purchases of shares) or remaining shareholders (for net redemptions of shares) might otherwise be adversely affected. By 'purchases' of shares we mean issues by the Company and subscriptions facilitated by the ACD and by 'redemptions' of shares we mean cancellations by the Company and redemptions by the ACD.

The COLL Rules acknowledge that the need to make a dilution adjustment may depend on the volume of purchases of shares or redemptions of shares. Accordingly, the ACD reserves the right at its sole discretion to impose a dilution adjustment in the following circumstances:

- (a) If the sub-fund is experiencing steady decline (net outflow of investment).
- (b) If the sub-fund is experiencing steady growth (net inflow of investment).

- (c) If the sub-fund is experiencing large levels of net purchases or net redemptions relative to its size.
- (d) Where the sub-fund experiences net purchases or net redemptions on any Dealing Day exceeding a particular value or a particular percentage of the value of the sub-fund.
- (e) In any other circumstances where the ACD believes it will be in the interests of shareholders to make a dilution adjustment.

The ACD is currently of the opinion that it is in the best interests of shareholders in the Company to make a dilution adjustment whenever dealings in the shares of any sub-fund result in shares in that sub-fund being issued or cancelled by the Company. The ACD believes that this policy should result in no significant dilution occurring. The adjustment will take account of any spread between the buying and selling prices of the relevant sub-fund's investments and the costs (which may include dealing charges and taxes) of acquiring or disposing of such investments, as the case may be.

The level of the dilution adjustment is set by the ACD based on prevailing market conditions. Where liquidity is restricted and trading in size in the portfolio's investments results in significant movement in the prices of these investments the ACD may adjust the level of the dilution adjustment to protect the interests of the ongoing investors in a sub-fund. The ACD has thresholds for the sub-funds for daily net inflows or outflows of cash into or out of the sub-funds. Above these thresholds, which vary by sub-fund and according to market conditions, the ACD will increase the dilution adjustment to reflect the increased dealing costs incurred by the sub-funds as a result of larger inflows and outflows. A consequence of this policy is, however, that smaller transactions made on any day that the relevant threshold is exceeded will also trade at the price incorporating the higher adjustment and this may lead to increased dealing costs. Whether an adjustment may be necessary will depend upon the net movement into or out of a sub-fund on any given day and on the underlying market conditions on that day and it is therefore not possible to predict when an adjustment may be made.

General Information cont.

Dilution Adjustment cont.

On any Dealing Day when the Company neither issues nor cancels shares in a sub-fund the price of shares in that sub-fund will not contain any dilution adjustment.

This policy to swing the dealing price will be subject to regular review and may change. The ACD's decision on whether or not to make a dilution adjustment, and on what level of adjustment to make in particular circumstances or generally, will not prevent it from making a different decision in similar circumstances in the future.

Where a dilution adjustment is applied, it will increase the dealing price when there are net inflows into the relevant sub-fund and decrease the dealing price when there are net outflows. The dealing price of each class of share in a sub-fund will be calculated separately but any dilution adjustment will in percentage terms affect the dealing price of shares of each class identically.

On the occasions when no dilution adjustment is made there may be an adverse impact on the value of the Scheme Property attributable to the relevant sub-fund.

Stamp Duty Reserve Tax (SDRT)

Generally, there will be no charge to SDRT when shareholders surrender or redeem shares. However, where the redemption is satisfied by a non-pro rata in specie redemption, then a charge of SDRT may apply.

Taxation Reporting

In order to fulfil its legal obligations, the ACD is required to collect and report certain information about shareholders (and in some circumstances the shareholder's controlling persons), including their identity, tax residency, tax status and financial information relating to their shareholding. Shareholders must provide the ACD with any information required to meet these obligations, and may also be asked to provide self-certifications and tax reference numbers or the equivalent. The ACD reserves the right to refuse an

application for shares or a transfer of shares until it receives a declaration as to the shareholder's tax residency or status in the form prescribed by the ACD.

The ACD is also required to provide to HMRC certain information regarding shareholders, payments made to shareholders and proceeds arising on the disposal of shares, and HMRC may pass such information on to the tax authorities of another jurisdiction.

Share Classes

The net asset value of each sub-fund, the net asset value per share, and the number of shares in each class are shown in the Fund Information sections of the relevant sub-fund. In each sub-fund all share classes have the same rights on winding up.

With effect from 1 March 2022, Class A shares are only available to persons with a written agreement with the ACD or one of its associates. This requirement for a written agreement does not apply to those who held shares in this Class as at 28 February 2022 and who will continue to hold shares in this Class.

Where Class C shares are available, they are only available to persons to whom the ACD, or an associate of the ACD provides services under an investment management agreement or who has a separate fee arrangement with the ACD or one of its associates.

The minimum lump sum investment amounts are shown in the table on page 91.

Equalisation

The Company will operate grouping for equalisation. Each class of shares will operate its own equalisation account. Shares subscribed for during a distribution period are called Group 2 shares. Shares subscribed for during any previous distribution period are called Group 1 shares. Group 2 shares contain in their subscription price an amount called equalisation which represents a proportion of the net income of the sub-fund that has accrued up to the date of subscription. The amount of

General Information cont.

Equalisation cont.

equalisation is averaged across all the shareholders of Group 2 shares and is refunded to them as part of their first distribution and is treated as a return of capital for tax purposes. Being capital it is not liable to income tax but must be deducted from the cost of the shares for capital gains tax purposes.

An 'income equalisation-like' mechanism will be operated by the ACD for conversions. The ACD will ensure that the mechanism is operated to ensure fair treatment of those converting their shares and other shareholders in the affected classes.

Fund Charges and Costs

For further details on the costs associated with investing in the sub-funds of the ICVC, please see the Enhanced Disclosure of Funds Costs and Charges document and Baillie Gifford's Funds Costs and Charges Summary, both of which are available on the website www.bailliegifford.com.

Conflicts of Interest

From time to time, there may be situations that give rise to a material interest or conflict of interest. Such interests can arise between the interests of the ACD, the Investment Adviser, other persons associated with them and the interests of the sub-funds and their shareholders. A material interest or a conflict of interest can also arise between the interests of different shareholders. In such circumstances the ACD will put in place effective organisational and administrative arrangements to manage and monitor the material interest or conflict of interest in a way that ensures shareholders are treated fairly, or where it is impractical to manage the conflict, it will be disclosed.

The ACD, the Investment Adviser and other persons associated with them may, from time to time, act as authorised corporate directors, investment managers or advisers to other persons, companies or funds which

follow similar investment objectives to the sub-funds. It is therefore possible that the ACD and/or the Investment Adviser may in the course of their business have potential conflicts of interest with the Company or a particular sub-fund. Each of the ACD and the Investment Adviser will, however, have regard in such event to, amongst other things, its obligation to act in the best interests of the Company so far as practicable, having regard to its obligations to other clients, when undertaking any investment where potential conflicts of interest may arise. The Depositary may, from time to time, act as the depositary or trustee of other companies or funds.

Full details of the ACD's conflicts of interest policy can be inspected at the offices of the ACD at Calton Square, 1 Greenside Row, Edinburgh EH1 3AN during normal business hours.
