

Fund objective

To outperform (after deduction of costs) a composite index comprising 60 % UK and 40 % overseas equities, as stated in sterling, by at least 1% per annum over rolling five-year periods.

The composite index is calculated by Baillie Gifford and comprises: 60 % FTSE All-Share Index and 40 % overseas equities. The overseas element is currently made up of 28 % FTSE North America Index; 28 % FTSE Europe (ex UK) Index; 28 % MSCI Pacific Index and 16 % MSCI Emerging Markets Index.

The manager believes this is an appropriate target given the investment policy of the Fund and the approach taken by the manager when investing.

There is no guarantee that this objective will be achieved over any time period and actual investment returns may differ from this objective, particularly over shorter time periods.

Investment proposition

The Fund is managed to produce a portfolio that is sufficiently different from the benchmark and that is capable of delivering meaningful outperformance over the long term. This is done by taking an active stock-picking approach in our regional equity portfolios. Asset allocation around client benchmarks is driven by the views of our investment teams based on the availability of attractive long-term investments in each area.

Index: 60% FTSE All-Share/40% Overseas (28% FTSE NA, 28% FTSE Europe (Ex UK), 28% MSCI Pacific, 16% MSCI EM). As well as cash in the bank, this balance includes unsettled cash flows arising from both shareholder flows and outstanding trades. Therefore, a negative balance may arise from timing differences between shareholder flows and security trading and does not necessarily represent a bank overdraft.

Key terms

Active share is a measure of the Fund's overlap with the benchmark. An active share of 100 indicates no overlap with the index and an active share of zero indicates a portfolio that tracks the index.

Annual turnover is calculated as the sum of the monthly turnover figures for the 12-month period.

Periodic performance is a method of evaluating how a fund is doing over time. It compares a fund's performance in each period to its performance in past periods. It also looks at the performance of the fund to the performance of an index or its peers.

Discrete performance is a method of evaluating the degree to which a fund performs compared against its benchmark on a given date.

Historic yield is based on distributions paid by the Fund in the previous 12 months as a percentage of the mid-market share price, as at the date shown. Investors may be subject to tax on their distributions, however, we are unable to give tax advice. Where we believe the historic yield to be materially unrepresentative, forecast yields have been quoted based on estimated income and expenses.

IA Sectors are provided by the Investment Association. These sectors break up the universe of available funds to help investors navigate the large number of available products.

Sustainable investment labels help investors find products that have a specific sustainability goal. This product does not have a UK sustainable investment label. This product promotes environmental and/or social characteristics but does not explicitly aim to achieve positive environmental and/or social outcomes, which is a key requirement to adopt a label. More details can be found in the product's SDR Sustainability Disclosure Document found within the document section of the website.

The ongoing charge figure may vary from year to year and will exclude the costs of buying and selling assets for the Fund (unless these assets are shares of another fund). The Ongoing Charge Figure (OCF) is at the latest annual or interim period. The OCF may be lower than previous declarations as a result of a revision to how the indirect fees associated with closed-ended investment companies need to be shown. This does not necessarily mean that fund expenses have gone down rather than we have reverted to how they have been calculated until 30 June 2022 to reflect the revised Investment Association's Guidance on Disclosure of Fund Charges and Costs (July 2020, updated January 2022, revised November 2023). Further explanation of all the charges and costs relating to this Fund can be found in the Enhanced Disclosure of Fund Charges and Costs document, which is available through our website, [bailliegifford.com](https://www.bailliegifford.com). Where the share class has been launched during the financial period and / or expenses during the period are not representative, an estimate of expenses may have been used instead. Baillie Gifford operates a single swinging price for the Fund and, therefore, may apply a dilution adjustment to the price to protect long-term investors from the costs associated with buying and selling underlying investments that result from other investors joining or leaving the Fund. This adjustment will affect relative performance, either positively or negatively.

Turnover is calculated by taking the smaller figure of either total purchases or total sales for the month and dividing it by an average market value. The Annual Turnover is then calculated as the sum of the monthly turnover figures for the 12-month period.

All figures are rounded, so any totals may not sum.

Target market

This Fund is suitable for all investors seeking a fund that aims to deliver capital growth over a long-term investment horizon. The investor should be prepared to bear losses. This Fund uses norms-based evaluation and is managed in line with the global goal of net zero greenhouse gas emissions by 2050 or sooner. This Fund is compatible for mass market distribution. This Fund may not be suitable for investors who are concerned about short-term volatility and performance, seeking a regular source of income and investing for less than five years. This Fund does not offer capital protection.

Risk warnings

Investment markets can go down as well as up and market conditions can change rapidly. The value of an investment in the Fund, and any income from it, can fall as well as rise and investors may not get back the amount invested.

The specific risks associated with the Fund include:

- Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care.
- The Fund has exposure to foreign currencies and changes in the rates of exchange will cause the value of any investment, and income from it, to fall as well as rise and you may not get back the amount invested.
- The Fund's share price can be volatile due to movements in the prices of the underlying holdings and the basis on which the Fund is priced.

Further details of the risks associated with investing in the Fund can be found in the Key Investor Information Document or the Prospectus, copies of which are available at bailliegifford.com.
