

Summary Prospectus

April 28, 2023

Baillie Gifford Health Innovation Equities Fund

Class K
(BGHDX)

Institutional Class
(BGHBX)

Before you invest, you may want to review the Fund's full prospectus, which contains more information about the Fund and its risks. You can find the Fund's full prospectus and other information about the Fund, including its statement of additional information ("SAI") and most recent reports to shareholders, online at <http://USmutualfund.bailliegifford.com>. You can also get this information at no cost by calling 1-844-394-6127 or by emailing northamericanvehicleteam@bailliegifford.com. This Summary Prospectus incorporates by reference the Fund's entire prospectus and SAI, each dated April 28, 2023, as supplemented or revised, and the financial statements included in the Fund's annual report to shareholders, dated December 31, 2022.

Investment Objective

Baillie Gifford Health Innovation Equities Fund seeks capital appreciation.

Fees and Expenses

The tables below describe the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.**

Shareholder Fees

(Fees paid directly from your investment)

Class K	Institutional Class
None	None

Annual Fund Operating Expenses

(Expenses that you pay each year as a percentage of the value of your investment)

	Class K	Institutional Class
Management Fees ^(a)	0.50%	0.50%
Distribution (12b-1) Fees	None	None
Other Expenses ^(b)	2.19%	2.19%
Total Annual Fund Operating Expenses	2.69%	2.69%
Fee Waiver and/or Expense Reimbursement ^(c)	(2.04)%	(2.04)%
Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement^(c)	0.65%	0.65%

^(a) The Management Fee consists of an Advisory Fee and an Administration and Supervisory Fee paid by the Fund to Baillie Gifford Overseas Limited.

^(b) Other Expenses for Institutional Class are expected to be higher than those of Class K in the future since Institutional Class is expected to bear sub-accounting expenses.

^(c) Baillie Gifford Overseas Limited has contractually agreed to waive its fees and/or bear Other Expenses of the Fund until April 30, 2024 to the extent that such Fund's Total Annual Operating Expenses (excluding taxes, sub-accounting expenses and extraordinary expenses) exceed 0.65% for Class K and Institutional Class shares. This contractual agreement may only be terminated by the Board of Trustees of the Trust. Expenses after waiver/reimbursement are expected to exceed 0.65% for Institutional Class in the future due to sub-accounting expenses.

Example of Expenses

The example below is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. It assumes that you invest \$10,000 in the Fund for the time periods indicated, regardless of whether or not you redeem your shares at the end of such periods. It also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. The example below also applies any contractual expense waivers and/or expense reimbursements to the first year of each period listed in the table.

Although your actual costs may be higher or lower, based on these assumptions, your expenses would be:

	Class K	Institutional Class
1 Year	\$66	\$66
3 Years	\$641	\$641
5 Years	\$1,242	\$1,242
10 Years	\$2,871	\$2,871

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These transaction costs, which are not reflected in "Annual Fund Operating Expenses" or in the "Example of Expenses" above, affect the Fund's performance. During the Fund's most recent fiscal year, the Fund's portfolio turnover rate was 12% of the average value of its portfolio.

Principal Investment Strategies

The Fund seeks to meet its investment objective by investing primarily in common stocks and other equity securities of companies that the portfolio managers believe have potential to bring substantial improvements in human health and healthcare systems.

In seeking to identify companies in the healthcare industry and healthcare-related industries that have such potential, the portfolio managers typically focus on companies that they believe are driving innovation across the full value chain of human health, which they categorize into five 'buckets': (i) understanding

of diseases, (ii) diagnostic healthcare tools, (iii) treatment for disease, (iv) prevention of diseases, and (v) operational efficiency in the healthcare industry. The portfolio managers employ a bottom-up stock-picking approach that seeks to make long-term investments in well-managed businesses with genuine and sustainable competitive advantages. The Manager's fundamental research process focuses on: (i) the opportunity for an issuer to deliver superior returns; (ii) the ability of the issuer to execute on that opportunity; and (iii) the current market valuation of the security.

Under normal circumstances, the Fund invests at least 80% of its net assets (plus any borrowings for investment purposes) in equity securities of companies engaged in or supporting innovation in one or more healthcare or healthcare-related industries. Healthcare and healthcare-related industries include companies that manufacture medical treatments, devices, or diagnostic tools, such as devices and tools that aid the understanding, early identification and prevention of human diseases or companies that provide healthcare supplies or healthcare-related services, and companies in the research, development, production and marketing of pharmaceuticals and biotechnology products, such as products for genetic analysis and engineering and protein-based therapeutics to treat or prevent human diseases. Companies providing healthcare-related services include companies that provide operational support to the healthcare system, such as information technology companies focusing on software for healthcare companies or information technology solutions relevant to the healthcare sector. In identifying candidates for the 80% test described above, the portfolio managers seek to identify companies for which healthcare and healthcare-related activities are expected to be a key driver of the company's growth over the long-term, but generally focus on companies that derive at least 50% of their revenue from healthcare and healthcare-related activities. The Fund may gain exposure to equity securities either directly or indirectly (such as through depositary receipts or participatory notes) and may invest in preferred stocks, convertible securities and warrants. The Fund is not constrained with respect to market capitalization and may participate in IPOs.

The portfolio managers select companies without being constrained by the Fund's primary performance benchmark, the MSCI ACWI Index, or by any healthcare-specific index (such as the Fund's secondary performance benchmark, the MSCI ACWI Health Care Index). Additionally, the geographic selection of countries is not constrained by any of the Fund's benchmarks. The Fund intends to invest globally, including in emerging markets, though the Fund expects that many of the innovative health-related companies in which it seeks to invest will be located in the United States.

The portfolio managers focus on company research and the long-term outlook of companies in human health. Ideas can come from a wide variety of sources, including, but not limited to, research trips, company meetings, and relationships with healthcare industry thought leaders and academic institutions. Stock ideas are normally researched to assess a range of factors, including: long-term growth potential, innovative technologies, competitive advantage, management, financial strength and valuation.

The intended outcome is a portfolio of between 25 and 50 stocks that the portfolio managers believe have the potential to outperform the Fund's primary performance benchmark over the long term. The Fund aims to hold securities for long periods (typically at least 5 years), which generally results in relatively low portfolio turnover and is in line with the portfolio managers' long-term investment outlook. Consistent with this investment outlook, the portfolio managers seek to identify companies with the potential to sustain financial growth over the long term. When assessing a company's long-term growth prospects, the portfolio managers seek to identify and to incorporate a range of factors that are material to managing the Fund's investment risks and maximizing capital appreciation. Such factors potentially include the environmental, social, and/or governance characteristics of the company, such as stewardship, sustainable business practices, and/or corporate culture.

The investment process can result in significant exposure to a single company or a small number of companies. The Fund is a non-diversified fund, which means that it may invest a significant portion of its assets in a relatively small number of issuers, which may increase risk. The Fund has adopted a fundamental investment policy to concentrate its investments (defined by regulations as investing at least 25% of its assets) in healthcare and healthcare-related industries. The portfolio management team reserves the flexibility to use the Fund's position as a shareholder to guide companies in the portfolio to resist excessive focus on shorter-term returns over the goal of delivering longer-term outcomes for both investors and society.

The Fund may invest without limitation in securities quoted or denominated in currencies other than the U.S. dollar and may hold such currencies. The Fund does not expect to engage in currency hedging and thus expects to be fully exposed to currency fluctuations relative to the U.S. dollar.

Principal Risks

The Fund's net asset value and returns will be impacted by the performance of the underlying investments of the Fund. An investment in the Fund is not a deposit in a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. You could lose money by investing in the Fund.

The principal risks of investing in the Fund (in alphabetical order after the first six risks) are:

- *Investment Style Risk* – Baillie Gifford Overseas Limited (the “**Manager**”) actively makes investment decisions for the Fund through bottom-up stock selection. Accordingly, the Fund will have risk characteristics that differ from its benchmark index. The Manager's judgments about the attractiveness, relative value, or potential appreciation of a particular stock may prove to be incorrect and cause the Fund to lose money or underperform compared to its benchmark index. There can be no assurance that the Manager's investment decisions will produce the desired results.
- *Healthcare Industry Risk* – The Fund intends to concentrate its investments in the healthcare industry. The healthcare industry is subject to regulatory action by a number of private bodies and governmental agencies, including federal,

state and local governmental agencies. The profitability of companies in the healthcare sector may be affected by government regulations and government healthcare programs, increases or decreases in the cost of medical products and services, demand for medical products and services and product liability claims, among other factors. Healthcare companies are subject to competitive forces that may result in price discounting. Many new products in the healthcare industry may be subject to regulatory approvals. The process of obtaining such approvals may be long and costly, and such efforts ultimately may be unsuccessful. Many healthcare companies are heavily dependent on patent protection, and the expiration of a company's patent may adversely affect that company's profitability.

- **Growth Stock Risk** – The prices of growth stocks may be based largely on expectations of future earnings, and their prices can decline rapidly and significantly in reaction to negative news. Growth stocks may underperform stocks in other broad style categories (and the stock market as a whole) over any period of time and may shift in and out of favor with investors generally, sometimes rapidly, depending on changes in market, economic, and other factors.
- **Long-Term Investment Strategy Risk** – The Fund pursues a long-term investment approach, typically seeking returns over a period of several years, which can comprise a full market cycle or more. This investment style may cause the Fund to lose money or underperform compared to its benchmark index or other mutual funds over extended periods of time, and the Fund may not perform as expected in the long term. The market price of the Fund's investments will fluctuate daily due to economic and other events that affect particular companies and other issuers or the market as a whole, and the market may disagree with the Manager's assessment for growth in the shorter- or longer-terms. Short- and medium-term price fluctuations may be especially pronounced in less developed markets or in companies with lower market capitalizations. See also "*Selected Investment Techniques and Topics—Our Stewardship Approach.*"
- **Non-Diversification Risk** – The Fund is classified as a "non-diversified" fund. A non-diversified fund may hold a smaller number of portfolio securities, with larger positions in each security it holds, than many other mutual funds. To the extent the Fund invests in a relatively small number of issuers, a decline in the market value of a particular security held by the Fund may affect its value more than if it invested in a larger number of issuers. The value of the Fund's shares may be more volatile than the values of shares of more diversified funds. See also "*Focused Investment Risk.*"
- **Focused Investment Risk** – Should the Fund focus its investments in related, or a limited number of, countries, regions, sectors, or companies, this would create more risk and greater volatility than if the Fund's investments were less focused.
- **China Risk** – Investing in securities of Chinese issuers involves certain risks and considerations not typically associated with investing in securities of U.S. issuers, including, among others, more frequent trading suspensions and government interventions (including by nationalization of assets), currency exchange rate fluctuations or blockages, limits on the use of brokers and on foreign ownership, different financial reporting standards, higher dependence on exports and international trade, potential for increased trade tariffs, sanctions, embargoes and other trade limitations, custody risks associated with investments in variable interest entities, and risks associated with investments in variable interest entities. U.S. sanctions or other investment restrictions could preclude the Fund from investing in certain Chinese issuers or cause the Fund to sell investments at a disadvantageous time. Significant portions of the Chinese securities markets may become rapidly illiquid, as Chinese issuers have the ability to suspend the trading of their equity securities, and have shown a willingness to exercise that option in response to market volatility and other events.
- **Conflicts of Interest Risk** – The Manager's relationships with the Fund's institutional investor base may give rise to various conflicts of interest, since the Manager will sometimes have an incentive to favor those shareholders over other shareholders in the Fund. In addition, the Manager serves as investment adviser to various clients other than the Fund, some of whom may pursue strategies that are substantially similar or nearly identical to investment strategies pursued by the Fund. This "side-by-side" management may give rise to various conflicts of interest, including, for example, in connection with the fair allocation of trades among the Manager's clients or the sharing of different, more, or more timely information regarding investment performance, portfolio holdings, strategy developments and/or the Manager's general market outlook. Furthermore, if investment personnel of the Manager hold board or other positions at outside companies, they could be exposed to material non-public information potentially impeding or delaying a Fund's ability to buy or sell certain investments, or they could otherwise be restricted in their ability to participate in a Fund's investment process.
- **Emerging Markets Risk** – To the extent the Fund invests in emerging market securities, the Fund may be exposed to greater market, credit, currency, liquidity, legal, political, technical and other risks different from, or greater than, the risks of investing in developed markets.
- **Equity Securities Risk** – Equity securities may react more strongly to changes in an issuer's financial condition or prospects than other securities of the same issuer. Investing in equity securities indirectly, such as through participatory notes or depositary receipts, may involve other risks such as the risk that the counterparty may default or that the investment does not track the underlying security as expected.
- **ESG Risk** – To the extent that the Fund's portfolio managers incorporate environmental, social and/or governance considerations ("**ESG Factors**") into the Fund's investment process as a part of the Fund's long-term investment approach, the Fund is subject to the risk that it may underperform funds that do not take ESG Factors into account. The consideration of ESG Factors may prioritize long-term rather than short-term returns, and therefore may negatively impact the relative performance of the Fund over the short, medium or even long term depending on how

successfully those ESG Factors are incorporated and whether such investments are in or out of favor. In considering ESG Factors, the portfolio managers may be dependent upon information and data obtained through voluntary reporting by issuers or third-party research that may be incomplete, inaccurate or unavailable, which could impact the portfolio managers' assessment of relative risks and opportunities. See also "Long-Term Investment Strategy Risk" and "Selected Investment Techniques and Topics—Our Stewardship Approach."

- **Geographic Focus Risk** – The Fund expects to focus its investments in a limited number of countries or geographic regions, and as a result may not offer the same level of diversification of risks as a more broadly global fund because the Fund will be exposed to a smaller geographic area. The performance of a fund that is less diversified across countries or geographic regions will be closely tied to market, currency, economic, political, environmental, or regulatory conditions and developments in the countries or regions in which the Fund invests, and may be more volatile than the performance of a more geographically-diversified portfolio.
- **Government and Regulatory Risk** – Governmental and regulatory authorities in the United States and other countries, have taken, and may in the future take, actions intervening in the markets in which the Fund invests and in the economy more generally. Governmental and regulatory authorities may also act to increase the scope or burden of regulations applicable to the Fund or to the companies in which the Fund invests. The effects of these actions on the markets generally, and Fund's investment program in particular, can be uncertain and could restrict the ability of the Fund to fully implement its investment strategies, either generally, or with respect to certain securities, industries, or countries. By contrast, markets in some non-U.S. countries historically have been subject to little regulation or oversight by governmental or regulatory authorities, which could heighten the risk of loss due to fraud or market failures in those countries. Governments, agencies, or other regulatory bodies in any country may adopt or change laws or regulations that could adversely affect the Fund or the market value of an instrument held by the Fund.
- **Information Technology Risk** – Cyber-attacks, disruptions, or failures that affect the Fund's service providers, counterparties, the securities markets generally, other market participants, or issuers of securities held by the Fund may adversely affect the Fund and its shareholders, including by causing losses for the Fund or impairing Fund operations.
- **IPO Risk** – The Fund may purchase securities in IPOs. These securities are subject to many of the same risks of investing in companies with smaller market capitalizations. Securities issued in IPOs have no trading history, and information about the companies may be available for very limited periods. In addition, the prices of securities sold in IPOs may be highly volatile.
- **Liquidity Risk** – The Fund's investments may be subject to low trading volume, lack of a market maker, contractual lock-in periods or regulatory restrictions, and the Fund may hold large positions in particular securities. As a result, it may not be possible to sell an investment at a particular time or at an acceptable price. Liquidity risk may be magnified during periods of changing interest rates, significant shareholder redemptions or market turmoil. Illiquid investments may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. In some cases, due to unanticipated levels of illiquidity the Fund may seek to meet its redemption obligations wholly or in part by distributions of assets in-kind.
- **Market Disruption and Geopolitical Risk** – The value of the Fund's investments could be adversely affected by events that disrupt securities markets and adversely affect global markets such as war, terrorism, public health crises, and geopolitical events and by changes in non-U.S. and U.S. economic and political conditions. These disruptions could prevent the Fund from implementing its investment strategies and achieving its investment objective, and increase the Fund's exposure to other risks detailed in this Prospectus. As a result, the Fund could lose money, experience significant redemptions, encounter operational difficulties, and suffer other negative impacts. Certain locations and industries may be particularly susceptible to this risk, and other risks may be heightened by such events.
- **Market Risk** – The value of the Fund's investments will be affected by fluctuations in the stock markets in which the Fund is invested, factors affecting a particular industry or industries, real or perceived adverse economic conditions, changes in interest or currency rates or adverse investor sentiment generally. Declines in securities market prices may reduce the net asset value of the Fund's shares.
- **New and Smaller-Sized Funds Risk** – New funds and smaller-sized funds, such as the Fund, will be subject to greater liquidity risk due to their smaller asset bases and may be required to sell securities at disadvantageous times or prices due to a large shareholder redemption. A fund that has been recently formed will have limited or no performance history for investors to evaluate and may not reach or maintain a sufficient asset size to effectively implement its investment strategy.
- **Service Provider Risk** – The Fund will be affected by the Manager's investment techniques, analyses, assessments and employee retention. Similarly, adverse events or performance failures at a service provider, such as human error, inadequate controls or insolvency, have the ability to adversely affect the Fund.
- **Small- and Medium-Capitalization Securities Risk** – Securities of small- and medium-capitalization companies can be more volatile due to various factors including more limited product lines, financial and management resources and market distribution channels, as well as shorter operating histories and potentially reduced liquidity, especially during market declines, than the securities of larger, more established companies.
- **Valuation Risk** – In certain circumstances, some of the Fund's portfolio holdings may be valued on the basis of factors other than market quotations by employing fair value

procedures. This may occur more often in times of market turmoil or reduced liquidity. Portfolio holdings that are valued using techniques other than market quotations, including “fair valued” securities, may be subject to greater fluctuation in their valuations from one day to the next than if market quotations were used. There is no assurance that the Fund could sell or close out a portfolio position for the value established for it at any time, and it is possible that the Fund would incur a loss because a portfolio position is sold or closed out at a discount to the valuation established by the Fund at that time.

Performance

The bar chart and table below provide some indication of the risks of investing in the Fund by showing changes in the Fund’s annual total returns from year to year and by comparing the Fund’s average annual total returns with those of the Fund’s benchmarks. Past performance (before and after taxes) is not an indication of future performance.

Annual Total Returns — Institutional Class Shares

Highest Quarterly Return: 6.65% (Q4, 2022)
 Lowest Quarterly Return: -21.54% (Q1, 2022)

In the table below, after-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. After-tax returns are shown for Institutional Class shares only, and after-tax returns for other share classes will vary. Actual after-tax returns depend on your tax situation and may differ from those shown. After-tax returns shown are not relevant if you are tax-exempt or if you hold your Fund shares through a tax-advantaged account. A description of the Fund’s comparative indices and details regarding the calculation of the Fund’s class-by-class performance are provided in the section of the Prospectus entitled “Additional Performance Information.”

Average Annual Total Returns for Periods Ended	1 Year	Since Fund Inception (12/28/2021)
December 31, 2022		
Institutional Class Returns Before Taxes	-32.46%	-32.38%
Institutional Class Returns After Taxes on Distributions	-32.46%	-32.38%
Institutional Class Returns After Taxes on Distributions and Sale of Fund Shares	-19.22%	-24.66%
Class K Returns Before Taxes	-32.46%	-32.38%
Comparative Indices (reflects no deductions for fees, expenses, or taxes)		
MSCI ACWI Index ⁽¹⁾	-17.96%	-17.98%
MSCI ACWI Health Care Index ⁽¹⁾	-5.71%	-5.38%

⁽¹⁾ The source of the index data is MSCI Inc. MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. The MSCI data may not be further redistributed or used as a basis for other indexes or any securities or financial products. This Prospectus is not approved, endorsed, reviewed or produced by MSCI. None of the MSCI data is intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such.

Purchasing, Exchanging, and Selling Fund Shares

To purchase, exchange, or redeem shares of the Fund through an intermediary, please contact your intermediary directly.

Other investors may purchase, exchange, or redeem shares on any day the New York Stock Exchange (“NYSE”) is open for trading directly from the Fund’s transfer agent, Bank of New York Mellon, by written request, as further described in the sections of the Prospectus entitled “Shares—How to Buy or Exchange Shares” and “Shares—How to Sell Shares.” The initial and subsequent investment minimums for the Fund shares are as follows:

Class of Shares	Minimum Initial Investment ⁽¹⁾	Minimum Subsequent Investment ⁽¹⁾
Class K	\$10 million	None
Institutional Class	None	None

⁽¹⁾ If you hold shares through a financial intermediary, the financial intermediary may impose its own, different, investment minimums.

The Manager and Baillie Gifford Funds Services LLC (“BGFS”), the Fund’s distributor, each reserves the right to waive any minimum in their sole discretion, and to reject any purchase or

exchange order for any reason. Additional information regarding restrictions on purchasing or exchanging shares is provided in the section of the Prospectus entitled “*Shares—Restrictions on Buying or Exchanging Shares.*”

Tax

The Fund intends to make distributions that will be taxable to you as ordinary income or capital gains, unless you are a tax-exempt investor or otherwise investing through a tax-advantaged account, such as an IRA or 401(k) plan. If you are investing through such a tax-advantaged account, you may be taxed later upon withdrawal of monies from that account.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary, the Fund and its related companies may pay the intermediary for services the intermediary provides to Fund shareholders. These payments are not primarily intended to result in the sale of Fund shares. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. In addition to the fees and expenses described in the “*Fees and Expenses*” section above, your broker-dealer or financial intermediary may charge commissions or other fees on purchases and sales of the Class K or Institutional Class shares of the Fund. Ask your salesperson or visit your financial intermediary’s web site for more information.
