

Sustainability Approach

This Fund has explicit commitments to integrate ESG factors into the investment research and decision-making process. The following commitments have a material impact on the composition of the Fund.

UNGC: The product will assess companies using a Norms-based Evaluation and will comply with the Investment Adviser's policy on assessing breaches of the United Nations Global Compact Principles (UNGC). Where breaches occur, the preferred approach is to use engagement in the first instance to encourage improvement.

Net Zero: The Investment Adviser will manage the portfolio to support the goal of net zero greenhouse gas ('GHG') emissions by 2050 or sooner, in line with global efforts to limit warming to 1.5C ("net zero"). As part of this process, all portfolio companies are actively assessed and prioritised for engagement for their alignment with net zero on an ongoing basis.

No Sustainable Investment Label

Sustainable investment labels help investors find products that have a specific sustainability goal. Further information on sustainable investment labels can be found on the FCA website: <https://www.fca.org.uk/firms/climate-change-and-sustainablefinance/sustainability-disclosure-and-labelling-regime>.

This product does not have a UK sustainable investment label.

Using a label imposes significant obligations on in-scope products, including (without limitation) requiring a specific aim to achieve positive environmental and/or social outcomes.

The Fund does not explicitly aim to achieve positive environmental and/or social outcomes, but it promotes environmental and/or social characteristics through the application of norms-based screening and its net zero assessment process.

Sustainability Metrics

Investment Adviser's assessment of portfolio companies' net zero targets through its 'Climate Assessment' framework.

|  |  |  |
|--|---|--|
| Companies committed to reductions in line with their fair share of a science-based 1.5C-aligned pathway, with appropriate demonstrations of targets, intent and strategic coherence. | Companies with disclosure and narrative that suggest they are preparing to set 1.5C-aligned targets in the near future. | Companies lacking sufficient disclosure or suitably robust targets, where the pathway to improvement is currently uncertain. |
| Leading: 41% of portfolio companies by count | Preparing: 23% of portfolio companies by count | Lagging: 32% of portfolio companies by count |

Source: Assessed according to Baillie Gifford's internal assessment framework described in the firmwide TCFD-aligned Climate Report, as at 30 September 2025. Excluding cash.

The Investment Adviser uses the categories above to determine whether companies in the portfolio are aligned with the goal of net zero greenhouse gas emissions by 2050 or sooner. Companies in the leading bucket are considered to be aligned already; those in the preparing category are deemed to be on track to be aligned; and those in the lagging category are not deemed to be on track at the current time. The Investment Adviser anticipates these figures will improve over time. 3% of portfolio companies by count did not have assessments available as at 30 September 2025.

United Nations Global Compact

This fund is committed to complying with the Investment Adviser's policy on assessing breaches of the UNGC. Companies directly held in the portfolio are monitored and assessed against the 10 principles of the UNGC and, if any breaches are identified, a formal engagement and monitoring plan will be implemented.

Material improvements are expected within three years of the commencement of our engagement. Should a company fail to demonstrate progress within expected timescales, the Fund would divest.

More details can be found in our firmwide [Stewardship Principles and Guidelines](#).

| | 30 September 2025 |
|--|-------------------|
| | Portfolio |
| Number of companies in the portfolio that the Investment Adviser has assessed as breaching the United Nations Global Compact, and have been subject to formal engagement and monitoring | 0 |
| Number of companies the Fund has sold due to their failure to demonstrate improvements during the formal engagement and monitoring process, within a reasonable timeframe (a maximum of three years from the date of engagement) | 0 |
